- DOUBLE GLAZED 2.7
- VENETIAN SHAPE AND CONTROL TYPES 2.8

VERTILUX ALUMINIUM VENETIAN BLINDS OFFER AN INNOVATIVE BLEND OF CLASSIC STYLE AND STATE OF THE ART ENGINEERING, USHERING A NEW ERA FOR THIS TIME-HONOURED TRADITION IN WINDOW COVERING. VENETIAN BLINDS MINIMISE ENERGY COSTS BY PROVIDING EXCELLENT INSULATION IN BOTH SUMMER AND WINTER. OUR PRECISION ENGINEERED COMPONENTS EFFORTLESSLY POSITION TO REGULATE LIGHT, GLARE AND UV PENETRATION. SLATS ARE DESIGNED TO COMPACT NEATLY, REDUCING STACKING-BULK WHEN NOT IN USE.

The unique Easytilt mechanism makes adjusting manual blinds a breeze with the 25mm blades. With just two and a half turns of the wand the blind can go from fully opened to fully closed.

Alternatively, Vertilux Venetian Blind Systems lend themselves perfectly to motorisation for ease of use; with no cords to be concerned with and also for those hard-to-reach applications. They can be operated via remote control or pre-programmed to operate at desired times.

The Easytilt 25mm Midnighter has the ladder holes punched towards the back of the slat together with a 7mm overlap to conceal the ladder hole, offering the ultimate in light control. With the Vertilux 25mm Monocommand Venetian system, a single chain controls all of the blind's functions: opening, closing, raising and lowering.

Vertilux Aluminium Venetian Blinds come in 25mm or 50mm wide blades in a range of colours with colour coordinated accessories.

Vertilux Venetian Blinds offer a wide range of shape options such as skylights, caravans and Cathedral shaped windows. We can also tailor Venetian Blinds to your particular windows from a template.

TECHNICAL DATA

AVAILABLE SYSTEMS	MINIMUM WIDTH (FIXED)	MINIMUM WIDTH (TILT ONLY)	MINIMUM WIDTH (SPLIT CONTROLS)	MINIMUM WIDTH (COMBINED)	MINIMUM WIDTH	MAXIMUM WIDTH	MAXIMUM DROP
25mm Easytilt 2.1a	110mm	180mm	240mm	290mm	180mm	3330mm	3700mm
