

Inspired by the sharp lines of Mount Kosciuszko, the **Asim** hardware range has been designed to complement the clean lines and robustness of our window and door frames. This range includes a square-shaped design that adds a touch of architectural sophistication to any project.

**Designed and Made in Australia
for Australian Conditions.**

ASIM SLIDING SECURITY LOCK

Asim[®]

& HARDWARE

Asim Sliding Security Lock

Operation:

A reliable mortice lock for sliding security doors with a stainless steel hook beak that is retracted by an outside or inside snib lever. Closing the door causes the hook beak in the lock to self latch and engage with the catch plate automatically. Once the beak is engaged, it may be locked (or unlocked) from either side by key.

Special Features:

- Stainless steel beak and catch plate as a standard feature for superior performance.
- Interior snib lever for quick and convenient locking without the need for a key.
- Fixing screws only accessible from the inside, providing enhanced security.
- Anti-lift pin on the catch plate engages lock body to prevent the door being lifted out of its tracks.

Multipoint:

Asim Sliding Lock body may be connected to multipoint kits to provide three-point locking. These kits provide a top and a bottom bolt, each connected to the main lock body by a steel cable or rod. The remote bolts are activated whenever the door is locked by key or snib (see next page for details).

Installation Features:

- Fits into industry standard cut-outs.
- Standard lock fits door frames from 19mm to 25mm thick.
- Suits both left-hand and right-hand sliding doors.
- Fitting instructions can be downloaded from www.alspec.com.au or QR code.

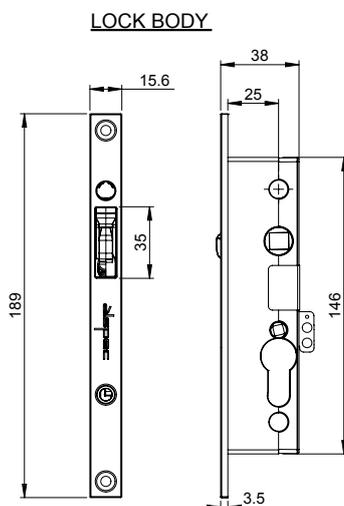

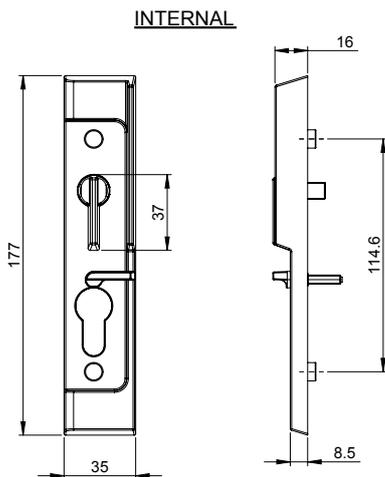

Keying:

Accepts Alspec euro profile lazy cam cylinders.

Finishes:

A range of powder coated finishes available as shown below.
