- Text must be centered under symbol.
- Colour of text must be a strong contrast to the background colour.

- Braille must be Grade 1.
- Braille must be left justified to text.
- Braille must be the same colour as the background.
- Background colour must be a strong contrast to the raised symbol and text.

### NOTE:

The above guidelines are to assist in design of layout for braille and tactile signs. S2K Identity Systems offer a standard braille and tactile signage range that is compliant with Australian Standards.

If you choose to design your own signs, it is suggested that this layout is followed to ensure compliancy.

(Please note, if designing your own signage, please keep up to date with current Building Code Regulations and Australian standards).
