

Create ideas that last
- when designing office desks

WE IMPROVE YOUR LIFE

LINEAR ACTUATOR TECHNOLOGY

LINAK - a serious sparring partner

- also when it comes to designing height adjustable office desks

For more than a decade one of LINAK's main focus areas has been the office desk market. Through the years we have launched a wide range of motor systems dedicated to office desks. At the same time, we have achieved extensive market information. Information that keeps us in the lead when it comes to developing new innovative solutions but also information about desk design, construction, norms and standards with which office desks must comply. When partnering with LINAK you get more than just a product in your hands. Our goal is to create added value to you by offering innovative solutions, extensive knowledge, world-class production and global presence.

Exchange of ideas

Over many years, DESKLINE® has established a good working relationship with a number of renowned architects and designers. We believe that perfect height adjustable furniture and workstations is the result of a close cooperation with a free and open exchange of ideas between your designers and the DESKLINE team of consultants and engineers.

Easy access to in-depth know-how and quality solutions

- **The advantages of an height adjustable system**
Electrical height adjustable desks are valuable for the end-user, ensuring optimal comfort and can even keep you fit. But, the motor system can also add other functions like PIEZO™ - which minimise the risk of squeezing obstacles. Let LINAK contribute with knowledge of how electrical movement can be designed into your desk design and get most out of the system.
- **Shorter development time**
Contact LINAK early in the idea-design phase and we can use each other as sparring partners. Furthermore, LINAK can be helpful with guidelines on how to obtain the best stability and how to mount the electrical system.
- **Keep in line with the official norms and standards**
LINAK has in-depth know-how on the standards and norms an office desk must observe. All our DESKLINE® systems are CE marked and comply with EN 60335-1.

Why you should choose to cooperate with LINAK:

- We have in-depth know-how about the industry as we have been one of the leading suppliers of height adjustable systems for more than a decade
- We provide optimal service through dedicated DESKLINE® staff, presently in more than 35 countries around the world
- We have a broad product portfolio of dedicated office desk systems for height adjustable desks ensuring ultimate freedom when designing
- We want to be your consulting partner sharing information about current and coming legislation, norms and standards
- We are at your disposal, consult us for inspiration, sparring in general or specifically if you require drawing material or want to borrow products

Global presence

LINAK has a well-developed sales and service organisation in Europe, America, Asia and Australia. Therefore, we can assist you and your customers locally, under the global sales concept idea:
Be global, act local

Terms of use

The user is responsible for determining the suitability of LINAK products for a specific application. LINAK takes great care in providing accurate and up-to-date information on its products. However, due to continuous development in order to improve its products, LINAK products are subject to frequent modifications and changes without prior notice. Therefore, LINAK cannot guarantee the correct and actual status of said information on its products. While LINAK uses its best efforts to fulfil orders, LINAK cannot, for the same reasons as mentioned above, guarantee the availability of any particular product. Therefore, LINAK reserves the right to discontinue the sale of any product displayed on its website or listed in its catalogues or other written material drawn up by LINAK.

All sales are subject to the Standard Terms of Sale and Delivery for LINAK. For a copy hereof, please contact LINAK.
