

Barrington Technology

Combining the beauty of natural slate with all the benefits of modern day technology, Barrington Roof Tiles offers a fully designed, premium roofing system that is found on all styles of homes across Australia.

Lightweight yet exceptionally durable, Barrington Roof Tiles are renowned for their modern, streamlined slate look which customers enjoy at a lower price than natural slate.

Barrington Roof Tiles require minimal maintenance – a common problem for natural slate and terracotta tiling - and are easy to handle and install. They are so strong each tile can hold up to 120kg in weight, making walking on them a breeze.

Featuring an interlocking design and moulded water channels, which ensures they won't leak or distort when correctly installed, Barrington Roof Tiles have excellent weatherproof characteristics – including fire, hail and UV resistance - making them suitable for all climates and conditions.

Locally manufactured by Australian company Composite Materials Engineering, Barrington Roof Tiles believe in creating quality products for quality homes and offers 30 year guarantee on structure and colourfast.

The Barrington **Slate Tiles** and Barrington **Roof Shingles** are the two innovative roofing products manufactured from Tobex, a high-strength, lightweight structural composite that has been tested by the CSIRO to the Australian Building Standards AS 4046–1992.

The CSIRO also conducted extensive environmental and performance testing on the tile which is supported by their CSIRO Technical Assessment 279.

Barrington Slate Tile

Weighing only 800 grams and measuring 300 x 336mm each, the Barrington Slate Tile is capable of supporting over 120kg in weight, making it safe to walk on and easy to handle.

Barrington Slate Shingle

The Barrington Roof Shingle is slightly heavier and larger, weighing approximately 1.3kgs and measuring 500 x 350mm, and is also able to support up to 120kg.

Both the Slate Tile and the Slate Shingle create the attractive flat, streamlined look that is so desirable for today's modern and classic design homes.

Barrington roofing products have been approved as an alternative to slate by Heritage architects and have been installed in Heritage listed areas.

Features at a Glance

Both roofing solutions have the capacity of 120kgs of weight ensuring durability.

- Slate Tiles only weigh 800 grams
- Roof Shingles weight 1.3kgs and are more larger in size
- Safe to walk on and easy to handle
- These slate tiles use an interlocking design and moulded water channels, alleviating the weight off the roof
- Suitable for modern or classic design homes
- Australian made
- Barrington's roofing products come with a 30 year structural and colour fast guarantee.
