

Bulwark HB Automatic Supermarket Gate

Single Gate D type arm

The Bulwark HB automatic supermarket gate is a fast opening, uncomplicated and straight forward product with all the essential features required to perform perfectly in areas such as supermarkets, gyms, canteens and industrial sites.

The set-up and testing is completed in our workshop, so no adjustments are needed on site.

The Bulwark HB automatic supermarket gate is in an extremely strong 6 mm steel housing which ensures protection against abuse and damage from trollies.

The high quality chrome finish matches the optional barrier rails and posts that are used to guide customers past the pay point.

The swing gate is opened by a microwave radar fitted underneath the black dome on the top of the gate post or by a sensor beam fitted in the posts.

In case of emergency the gate arm can be manually pushed open and an alarm will sound.

Safety is a priority with this product and the electronic safety sensing is very effective. When the gate is closing and an obstruction is sensed the gate stops.

If the gate is forced an internal clutch mechanism prevents damage to the motor and gearbox and an alarm is activated.

The modern compact design and high quality finish makes the Bulwark supermarket gate suitable for all establishments.

Optional barrier rails and posts are configurable to suit a wide range of applications. Barrier rails 1200 mm long x 38 mm diameter and can be cut to size on site.

Single Gate U type arm with safety rail

Optional barrier rails and posts

Technical Specifications

Specification	Bulwark HB Automatic Supermarket Gates
Clear opening	Adjustable 600mm - 1000mm
Opening speed	1 second
Hold open time	1-6 seconds
Duty cycle	100%
Inputs	dual gate, infra-red beams, second radar
Power supply	240vac
Current	0.13 amps @ 240 v
Environment	10°C - 50°C
IP rating	IP44 (internal use only)
