

MIXED DOUBLE

Groceries must be stored so that individual items can be located and retrieved easily

Fresh foods need to be kept cool

Mixed double: Fridge plus larder unit.

Keseseböhmer's CONVOY provides space enough to store all the groceries for a household in one centrally positioned unit with a very small footprint. It makes kitchen work much easier, it saves time and effort and it effectively avoids the risk of items being forgotten at the back of a cupboard.

Together the fridge + CONVOY create a storage centre in a modern fitted kitchen. Your personal stock of groceries is accessible **24 hours a day, 365 days a year** – and you **don't have to set a foot outside your front door.**

“A perfect food storage solution saves a lot of time, effort and money. It makes cooking more flexible – and it's suddenly become absolutely simple to achieve!”

CONVOY

We think there better ways to spend your time than puzzling about **food storage**.

Although most people in urban areas can find a 24-hour supermarket or convenience store with late-night opening, almost every household still keeps a stock of dried and frozen foods – pasta, sugar, flour, rice, salt cocoa, jam, tinned food, sauces, ketchup. By contrast with fresh foods, which are generally stored in the fridge, dry goods are usually spread around several different cupboards. This way of storing things costs time and money.

- The amount and value of stored food is generally underestimated
- It's very difficult to keep track of what you've got stored
- You waste time looking for things
- Some stored stuff is overlooked or forgotten
- Sometimes you double buy items you'd forgotten you had, or you miss the use-by dates

CONVOY makes dreams come true.

With **CONVOY** we have worked systematically to take the design of food storage units to a new level. One glance makes this evident: the trays seem to float effortlessly. They offer more usable space and excellent visibility. One gentle pull makes your entire stock of groceries accessible. Items are stored for high visibility – just the way they stand on supermarket shelves – so that you can clearly see the fill levels, the labels and even the use-by dates.

Top runner concealed by the tray. Newly designed runner connections mean more choice with fewer variants.

Easier loading and unloading with no side railing, a clear overview and total transparency.

Easy, stepless height adjustment for the trays – no tools required.

100 kg load capacity. Store all your groceries in just one unit.

Quiet – opening damping is standard. The automatic closing mechanism has been optimised for CONVOY. The silent storage unit!

Improved, smooth action. A new runner system ensures CONVOY glides even more softly out of the cabinet.
