AN AUSTRALIAN OWNED COMPANY

Our History

Sealeck is an Australian-owned company established in 1977. The Sealeck name has been synonymous with the design and manufacture of quality doors and windows for the past 30 years. This experience has resulted in Sealeck being able to offer the following specialist commercial / industrial, bio-containment and high security applications: -

Our Product Range

Commercial/Industrial Doors and Windows

Sealeck provides functional, specialist door and window systems to suit many industries and market sectors including fire, acoustic, locomotive, remote area housing, switch room and transportable / portable buildings to regulation standard or tailored to customer specifications. Features include:

- Door leaf range provides choice of security, durability and function.
- Frames designed to simplify installation into varying walling systems.
- Products can be provided pre-finished in durable, long lasting powder-coating and oven baked finishes, eliminating onsite painting.
- Pre-hung doorsets together with factory preparation and fitting of door hardware eliminates costly and labour intensive site installation.
- Doors & Windows to suit Australia's most harshest & remote environments.

Bio-Containment Doors, Windows and Pass-thru Units

- Sealeck Bio-Containment Doorsets & Windows have been developed with varying options to satisfy performance, functional, aesthetic & budgetary requirements for PC2, PC3 & PC4 bio-containment, research & healthcare facilities.
- Sealeck have the expertise to suggest the material of construction, finish and design of doorsets (frame & leaf) including vision panel & hardware to suit varying Bio-Containment levels and walling types.
- A variety of Bio-containment windows including factory glazed units can be supplied.

High Security Doors, Windows, Pass-thru Units and Counters

- Intruder, Ballistic and Blast protection for commercial, government & institutional facilities.
- Sealeck attack and bullet resistant doors are designed to meet customer specifications and requirements whilst also complying with numerous Australian and international standards
- Windows incorporate clear or one way vision glazing fitted into a steel or aluminium frame.
- High security counters provide document or money exchange and natural voice transfer whilst providing floor to ceiling protection and incorporating fluoro lights & venetian blinds.
- Pass through drawers and trays enable the safe transfer of cash, EFTPOS, documents, goods and cash register trays between secure and non secure compartments.

- SARS facility in Hong Kong

Past Projects

High Security

Sealeck has been supplying 30 of Australia's overseas embassies with doors, windows, counters and pass-through units to meet varying intruder, ballistic, blast and in some cases fire requirements

In addition to embassies, Sealeck design and manufacture high security products to the following:

- Lucas Heights Nuclear Reactor
- Financial institutions including Commonwealth Bank, Westpac, and American Express
- Retail stores including Target, Coles, K-Mart, Big W, Woolworths and Safeways
- Major petrol station outlets including Woolworths Petrol and Caltex
- Metro Rail NSW and Airport Link
- North Sydney TAFE and other secondary educational facilities

Bio-Containment

Sealeck supply Bio-Containment doors to several hospitals nationally and internationally, including:

- A disaster response unit at Westmead Hospital. The unit was designed to withstand physical, biological and chemical attacks / bomb-blasts
- High containment doors to the University of Hong Kong "SARS" research facility

Commercial/Industrial

Sealeck is a supplier of specialist doors to high performance applications such as water treatment and power plants including Lucas Heights Nuclear Reactor.

National Rail commissioned Sealeck to design a door system to be used on 134 locomotives. This project is an example of customer-specific door solutions offered by Sealeck. The locomotive doors were tested to meet fire, acoustic and heavily loaded consecutive door slam standards (200,000).
