PRODUCT SAFETY & TRANSPARENCY

Aspecta's product testing program is remarkably stringent. Aspecta products are tested to the latest standards for Volatile Organic Compounds (VOCs), formaldehyde, phthalates, and heavy metals. In fact, the standards used for the testing of phthalates and heavy metals in Aspecta Ten are the same standards used for the testing of children's toys, setting a very high bar. Aspecta Ten has surpassed that bar - and we welcome you to inspect our HPDs and Declare Labels to your satisfaction. Equally important is the fact that Aspecta Ten is FloorScore certified, thus ensuring it meets strict standards for indoor air quality.

By selecting Aspecta, you have made the choice for safe and sustainable products. And isn't that what we all want when it comes to products in our businesses and homes? Come join us at Aspecta and discover all of the possibilities of resilient flooring.
