

WINDOW FILM
SOLUTIONS FOR YOUR
WORK SPACE

WHY WINDOW FILM IS A MUST-HAVE FOR All Commercial Spaces

REDUCES ENERGY COSTS

Solar films can help you save on energy costs, reducing your utility bills. Helps keep the warm air from escaping in winter and keeping the insides cooler in summer.

DECREASES ENVIRONMENTAL IMPACT

Specialised films like 3M Thinsulate maximise the efficiency of glass. A single-glazed window with 3M™ Thinsulate™ Window Film applied has a similar insulation value as double-glazed windows, maximising performance.

PROTECTS FROM VANDALISM AND GRAFFITI

Sacrificial anti-graffiti film is a quick, easy and cost-effective way to deal with vandalism and graffiti. Simply replacing a layer of film that's been defaced is infinitely cheaper than replacing damaged glass.

HELPS PREVENT BREAK-INS

Safety & security films increase the thickness and durability of your glass, making it harder for intruders to break through. Some security films can be up to 10 times thicker than standard film.

INCREASES PRIVACY & ADDS A DECORATIVE TOUCH

Apply frosted or decorative film to meeting rooms, reception areas or hallways to add privacy. Decorative films are also great for corporate signage & personalisation both the exterior and interior of your building.

IMPROVES WORKPLACE PRODUCTIVITY

Tried and tested films demonstrate that once applied to glass, glare reduction and the improved climatic conditions help minimise distractions, improving productivity.

SOLAR CONTROL

IMPROVING ENVIRONMENTAL EFFICIENCY BY Rejecting Heat, Glare and Minimising UV Rays.

Solar control films offer ultimate sun control solutions at an affordable cost and applied to commercial buildings, are a good substitute for high maintenance curtains or blinds.

Having your windows tinted with our solar control films will block up to 99% of harmful UV rays coming through the glass, and help reduce fading of furnishings and floorings.

There's reduced energy costs to be gained through the extra insulation window films provide, allowing temperatures between rooms to remain consistent. Available in a range of tones and performance levels, our solar control films can provide solutions for every type of building.

FEATURES AND BENEFITS

- Protects from damaging UV rays
- Improves insulation, helping to reduce energy costs
- Maintains clear views
- Glare reduction
- Comprehensive 3M warranty

SAFETY & SECURITY

HELPING YOU KEEP Outside Dangers, Outside!

Safety and security films greatly increase the strength and durability of the glass in your building, not only helping to hold glass together should it break but also increasing the difficulty for intruders gaining entry. Some security films can be up to 10 times thicker than standard film.

Available as a tinted film for additional solar protection, you'll be able to reduce the amount of glare and UV rays coming in through the glass plus adding extra security.

Our range of sacrificial anti-vandal films protect glass from scratches and graffiti, helping to uphold the visual appeal of your building.

FEATURES AND BENEFITS

- Available in clear or tinted
- Helps hold broken glass together
- Helps prevent personal injury and liability due to glass breakage
- Comprehensive 3M warranty

DECORATIVE & PRIVACY

INCREASE PRIVACY, Or Add a Decorative Touch.

Utilise a frosted film for your conference room or design a pattern to liven up your entry area. Still allowing light to pass through, decorative and privacy films are a cost-effective way to liven up rooms and extend corporate identity throughout the building, for interior or exterior.

Please talk to us about how we can customise designs specifically for you.

FEATURES AND BENEFITS

- A design element that can transform plain glass surfaces
- Add privacy, create stunning corporate identity, or simply used as a decorative feature
- Saves on the cost of conventional blinds with their maintenance and cleaning
- Perfect for display windows, retail store fronts, and internal glass partitioned offices
