GP ascot elegance

Give authentic distinction to any room: especially formal dining rooms, master suites, hallways or entry foyers. Combine with an easydado rail, for infinite elegance. Pre-primed with an industrial grade undercoat on both sides, for quick and easy final coat application. The more contemporary ascot.Vogue range presents a sophisticated, well-defined profile.

An easy DIY dado wall makeover to bring your room to life

1 Calculate what you need
2600mm

2 Position the panels
Centreline / A / 10mm Gap

3 Apply the adhesive and fit

4 Add skirting and trims
Panels / Architrave / Skirting

1 To work out how many panels you need, simply measure the wall width, divide it by the panel width then round it up. For a single panel of 1200mm wide and a 2600mm wall, you'll need 3 panels. **Note: The panel widths vary.** Please check panel dimensions above.

2 The profile of the panel determines where to begin positioning. For Ascot panels (square profile) position from the centre. For an even number of panels, start with the first panel adjacent to the centreline (position **A**). For an odd number, place the centre of the first panel on the centreline.

For other profiles (VJ, Regency) you can start in the corner and work your way out to the final edge and cut to suit. Near corners, doorways or windows, measure the gap and cut panels to fit.

3 Simply run a flexible adhesive down the walls allowing a 10mm gap from the floor to the base of the panel. Attach the panels using the easy joining system and use nails top and bottom to hold it secure until the adhesive cures.

4 When all the panels are fitted, reattach the skirting boards, add architraves and dado rails as required. You can now finish with your final coat of paint, and sit back and admire your brand new room.
