

Healy's

BUILDING

Period Weatherboards and Shingles...
Create your dream period home

Catalogue

Thank you for taking the time to browse through our brochure...

Healy's Building has been providing domestic extensions and period style renovations to home owners in Australia since 1982. During that time, we found that our customers demanded Period Style Weatherboards and Shingles to replicate the original buildings' facades - the challenge at that point was that we couldn't find them anywhere!

After extensive research, our team was successful in reproducing them for our own clients' projects. We then decided to manufacture them for builders and renovators who desired the same 'authentic period charm' for their projects, hence the 'birth' of Healy's Building Period Style Weatherboards and Shingles being manufactured and supplied to the industry.

7 reasons YOU should call Healy's Building today!

1. We're committed to maintaining the architectural heritage of yesteryear - no matter what the design;
2. We have a large range of custom made period style timber weatherboards and shingles to help you reproduce that 'authentic' period facade to your home;
3. We are a second generation Australian owned family business employing fully qualified trades people and professionals;
4. We only use Australian timber sourced from renewable timber plantations;
5. We guarantee 100% commitment to your finished product;
6. We guarantee service on time, every time; and
7. We guarantee a solution for your period home renovation or building.

*"I really believe it's the facade that makes the house.
All those beautiful period details, those finishing touches
that turn an ordinary house into a work of art.
The notched weatherboards we sourced from Healy's Building
helped us manage just that."
- Claudio & Loretta Cavallo*

*"The homes with period features are the most keenly sought."
- 7.30pm Report, ABC - 21st June 2007*
