

Falper Controstampo

Designed by Dario Gaudio and Vittorio Venzia, Controstampo draws inspiration from industrial objects. The freestanding bath and basin are made with a liquid corten finish, available in copper or white. The special surface on Cristalplant Biobased®, is made through an authentic process of oxidation of metallic paint, which accentuates the industrial character of the collection.

Falper Controstampo is available exclusively at Rogerseller from March 2015. Visit our showrooms or rogerseller.com.au to experience further.
