Translucent Building Elements  
Translucent Building Elements

## Windows

### Advantages

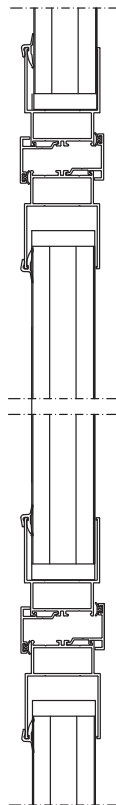

- quick and easy installation
- especially made for use with Rodeca translucent building elements
- translucent
- heat-insulating
- high temperature resistance
- versatile designing in form, colour and function
- good long term performance through UV protection
- 200 x times tougher than glass
- Shatter proof
- Glazing with insulating glass partially applicable

### Applications

- Ventilation
- Sports and industrial halls
- Industrial buildings
- Residential buildings
- Smoke extraction
- Natural day light

### General information Windows

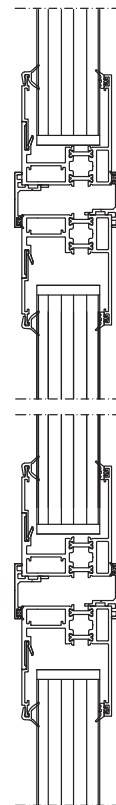

Rodeca Aluminium windows are designed to integrate with Rodeca facades. Rodeca windows can be glazed with our polycarbonate panels or with isolating glass. Divided into four different product series we can cover all demands from non-thermally broken sashes for industrial glazing to thermally broken sashes for residential building. Also skylights as non-thermally and thermally broken version. More detailed information on our window series can be found in our technical manual.

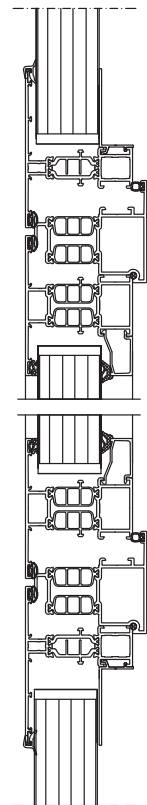

Systems cross section Series 80

Systems cross section Series 82

Systems cross section Series 84

Systems cross section Series 85

**U-Panels**  
U-Paneele

**Multi Wall Sheets**  
Hohlkammerscheiben

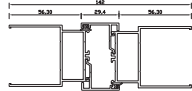

**RT- Thermolight**  
RT- Thermolight

## Manufacturing program

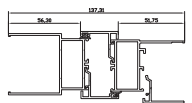

### Series 80

Non-thermally broken aluminium window system "standard"  
The glazing is possible with 40mm panels respectively with isolation glass up to 20mm

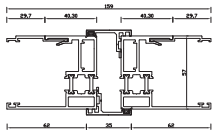

### Series 82

Non-thermally broken aluminium window system for combination with aluminium framing Eco profiles the glazing is possible with 40mm panels respectively with isolation glass up to 20mm

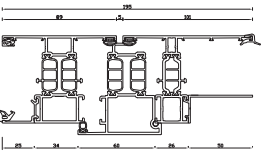

### Series 84

Thermally broken aluminium window system  
The glazing is possible with 40/50/60mm panels

### Series 85

Thermally broken aluminium window system  
The glazing is possible with 40/50/60mm panels respectively with isolation glass up to 48mm
