Roof Ventilation

The Australian climate is variable – Summers have extended periods of high temperatures, and in some areas we see prolonged periods of continual wet weather. From these conditions it puts pressure on the home to cope with hot and damp extremes. The answer is to drive heat and moisture out of your home throughout the year, Solatube Solar star provides a cost effective solution.

Drive out heat and moisture

More airflow

Advanced solar panel technology generates maximum power through a large 320 diameter fan.

Tailored roof tile

Seamless one piece flashing guarantees a leak-proof and durable product. Customised to your roof.

High-performing

High-performance motor is reliable, long lasting and whisper quiet. Installed in under 1 hour by a Solatube Certified Installation consultant.

Leading warranty

Brush-less, durable motors and quality components throughout.

Whole House Fan

Comfort throughout your whole home for every season

- Cools your home efficiently in minutes during hot summer months
- Improves air quality removing odours all year round
- Extracts stale air in winter months
- Creates a healthier home
- Helps reduce air conditioning costs

Refresh your home this summer.

Do you want your home to have continuous fresh air recirculating around the whole house this summer? Look no further.

Solatube Whole House fan pulls cool, fresh outdoor air into living spaces through the windows, and pushes hot stale indoor air through your roof cavity and out the vents. It doesn't recirculate air (as with air-conditioning) it provides natural fresh air throughout the home.
