

Flush Finish Door Jamb... No Architraves!

EZYjamb®

CREATE stunning clean lines for square-set interiors using the patented Ezy-Jamb door system. Architects and interior designers throughout the world recognise Ezy-Jamb as the answer to creating contemporary doorways in modern living and working spaces.

Ezy-Jamb's flush finish look seamlessly blends doorways and openings into internal plaster walls with definitive yet subtle styling. Inconspicuous door jambs with no architraves, created using Ezy-Jamb, are at home in virtually any interior environment, including apartments, award-winning homes, offices, hospitals and public venues. Ezy-Jamb's flush finish look is available in a wide range of thickness. Once fixed to the lining board, the perforated sides are flush jointed and painted to create an architrave-free doorway. The Ezy-Jamb system is provided with quality stainless steel hinges and latch plate, offering a complete door jamb package.

Designed to suit any door size or door configuration, the exceptional versatility and
