

DAYLIGHT

The Illuminated Ceiling

NEW!

Create a luminous atmosphere without harsh glare

- Induce a positive mood to improve productivity
- Drive away shadows
- Natural or backlit features
- Skylight or light wall effects

DAYLIGHT

The Illuminated Ceiling

Daylight illuminated ceilings and walls turn your linings into light sources. This eliminates shadows and creates a bright and positive atmosphere.

A highly diffuse light source makes it possible to create beautiful effects while saving on energy.

Daylight ceilings and walls are suitable for any environment from the even and efficient lighting required for a laboratory to the technical requirements of an entertainment venue.

Daylight is produced using SupaExpanse membrane sourced from Extenzo, France. Like all SupaExpanse taut ceilings and walls Daylight features:

- ▶ Quick and clean installation.
- ▶ Maintenance free and durable.
- ▶ Total moisture resistance.
- ▶ Removable for servicing.

Daylight can also be combined with other specialised SupaExpanse applications:

- ▶ Climaclick air conditioning ceilings for perfect temperature distribution and to eliminate grilles.
- ▶ Acoustic reverberation control.

Daylight illuminated ceilings and walls present endless application opportunities to make the any interior stand out from the rest.

How it works

1 | Fluro or LED lights are laid out over the area.

2 | The SupaExpanse membrane is stretched over the area.

3 | The end result, perfectly even diffused lighting.

Skylights, feature panels, light tiles, define an area or simply let the light in!

Wall panels can light an area, add a feature and create atmosphere in any interior.

DAYLIGHT

The Illuminated Ceiling

Shapes, contours, and floating effects

Because Daylight is so flexible virtually any shape, contour or floating effect can be created.

The possibilities are only limited by your imagination!

Moisture Resistant

Daylight is insensitive to damp and humid conditions making the perfect way to take swimming pools, spas, saunas and bathrooms interiors beyond the ordinary.

aurora

Kaleidoscopic Features

Want something more colourful?

aurora Kaleidoscopic Features add colour and movement to your feature ceiling.
