

rosslinear

electronic access control

The rosslinear electronic access control from Lock Focus is an elegant and stylish breakthrough in keyless electronic codepad technology.

The highlights of the product include:

- intelligent and secure microprocessor
- suitable for commercial and domestic applications
- Colour LED status indicator
- estimated 3 years battery life/30,000 operations
- modern, discreet styling
- 4 modes of operation: normal, passage, master access, time delay
- over 200 user codes of 4 - 8 digits
- codepad size 165 x 39 x 15mm

The rosslinear electronic access control provides quick access to the user and can be easily installed with your existing door hardware. Configuration options include emergency exit release and additional codepads and strikes.
