

PROPOSED SHOW ROOM

HEAD FIXING BRACKET

150 x 75 Oval Profiled Post

Australian Glass Assemblies International introduces the newly developed Austvision Spider Post Glazing System, Auspegs, for low level facades, shopfronts and canopy glazing for the glass and aluminium industries.

The simplistic ultra modern architecturally appealing oval shaped 150 x 75 aluminium post, together with the spider fittings which connect the toughened (tempered) glass panel forming a façade system, offers architects and interior designers a new innovative concept and an economical solution with ease of installation and the capability to fast track projects.

BENEFITS

Austvision Spider Post Glazing System is a fast track solution and easy, quick to install requiring little preparation in the factory and on site.

Auspegs can be installed and removed within hours without loss of time and sales.

Auspegs can be glazed with various materials such as glass, polycarbonate, PVC sheets and other panelling material.

Austvision Spider Post Glazing System is designed to meet the Australian and New Zealand Standards

AS 1288 – 2006 Glass in Buildings

AS/NZS 1170.1 - 2002 Structural Design Actions.

AS/NZS 1170.2 – 2002 Wind Loads

APPLICATION

The Austvision Spider Post Glazing System modular format provides design and creative flexibility - ideal for low level façade glazing, shop fronts, showrooms and recreation halls, balustrades, barriers and fencing including canopy, walkway roof glazing – domestic and commercial buildings.

Austpegs are commonly used on permanent and portable display sign boards and exhibition stands and booths.

Internal partitions, temporary walls and decoration are all in the formulation of the savings equation.

TECHNICAL

The Austvision Spider Post Glazing System is supplied with the following material specifications:

The profile oval shape extrusion is of architectural aluminium 6063-T5, standard powder coat finish to closely match the satin stainless steel colour (other colours available on request).

The post head and foot supporting plates are supplied in 316 grade stainless steel and zinc plate structural steel shaft for internal inserts for additional strength.

The spider and glass fixing screw assembly is supplied in 316 marine grade stainless steel with a sliding feature to fix in the post slot - for vertical adjustment.
