

 **ASKO**
BUILT TO LAST LONGER

The ASKO way

We are aware that our environmental footprint will affect our future. It's essential that we make informed choices and take their green consequences into account. We are proud to say that commitment to the environment has traditionally been an important part of ASKO's ethos. Perhaps because the factories have always had nature on their doorstep.

Today ASKO is a leader in environmental responsibility. We do much more than make water and energy efficient appliances. Much more than having the intelligent technology that automatically selects the minimum amount of water needed.

For us it's not about how much we use, but how little we waste. By adhering to stringent manufacturing standards we keep our wastage to a minimum; in production, in use and at the end of the life cycle. In fact, all our machines are marked for recycling. This has awarded us with the ISO 14001 Environmental Accreditation which ensures that ASKO's products are ecologically aware from the cradle to the grave.

So when you choose to purchase an ASKO appliance for its design and functions, we can promise many years of dependable service. And as your ASKO toils away, year after year, you can relax in the certain knowledge that your choice is environmentally responsible.

Hidden Helpers

ASKO offers practical, integrated solutions in the laundry. Don't let the fact that they are hidden fool you. In fact, you are looking at your new best friends in the laundry.

The pull-out shelf with an integrated basket can be used for extra bench space or for folding and sorting garments in the shrinking laundries of modern homes.

The Hidden Helper ironing board is a simple, yet well considered solution. It's always readily available, but easy to hide away when not in use.

The spacious pedestal drawer is made of steel for durability, in true ASKO tradition. It has been designed to look seamless when matched with our washer or dryer and will not only act as a useful storage area, but also makes loading and unloading the machine simple.

Each of the ASKO Hidden Helpers is integrated with the washing machine and tumble dryer, preserving the chosen design theme. All handles have been removed in favour of a push-pull solution.

Make it simple.

Scandinavian design is unique, with its own aesthetic expression and appearance. It is pure, simple and minimalist. It is also extremely functional and ergonomic. ASKO's new range of laundry appliances focuses on these characteristics. Being coordinated and integrated these products are simple and easy to use. The In Line control panel displays what the machine is doing, and program changes can be made by one simple turn of the control knob.

The tactile feel and durability of the control knob, communicates the quality of the product. This multifunctional single control simplifies the complexity of the machines operation.

ASKO
MADE IN SWEDEN

Make it disappear.

We are proud to present the world's most coordinated range of laundry appliances.

By integrating the appliances with your cabinetry the laundry will become a pleasant and harmonious environment in which to work. But it also gives you the freedom of putting your laundry appliances into any part of the home.

When buying an ASKO washing machine or tumble dryer you can choose between different doors: stainless steel, white, black or integrate the door to match your cabinetry. That's what we call flexibility.

The age of change in the laundry.

When our designers adopted the motto 'less is more' it was the beginning of the simplicity of ASKO designs. ASKO became the first whitegoods manufacturer to apply this principle to the laundry and kitchen.

The new laundry solutions do more than offer form and function. They adhere to ASKO's core values; caring for the environment, offering you durability and Scandinavian design. In short, ASKO's laundry solutions will cater for your every need.

W6903

Front Loading Washing Machine with concealed door.

Models:

W6903Fi - Customize with your own door or an ASKO Door

W6903SS - TouchProof™ stainless steel as depicted

W6903WH - White

Programs:

- 13 Programs

Options:

- Pre-soak
- Anti-crease
- High water level
- Rinse: Economy, Normal, Super
- Temperature: cold or 30°- 95° C
- Spin speed: No drain, 0 - 2000 rpm
- Delayed start: 1 - 24 hours

Capacity:

- 6kg wash

Environment:

- 4 Star Water Rating
- 4 Star Energy Rating
- All components marked for future recycling
- ISO 14001 - Environmentally Certified

Technology:

- SensiSave™
- Temperature sensor
- Balance control

Construction:

- Quattro™
- SmartSeal™ no rubber bellows
- 307mm door opening for easy access
- Stainless steel inner/outer drum
- Quiet Induction Motor
- Induction motor without carbon brushes
- ISO 9001 - certified production

Convenience:

- Logic Line Control panel with easy to use dial
- Easy to read display with all program information and status
- Program memory
- Audible end signal
- Delayed start
- Door can be opened during wash

Safety:

- 7 Step Aqua Safety System™
- Kidsafe Controls™

W6983

Front Loading Washer

W6983 all features the same as the W6903 except for the following

- Only available in white
- 1800 Rpm maximum spin speed
- No side opening door
- ASKO's new Heat Safe Door available on W6983

Key Features:

Logic Line Control

- ASKO's simple one dial operation. A new machine can be daunting in the beginning so ASKO has simplified it by having a clear and easy to read screen combined with a durable steel control dial.

Quattro™

- ASKO's unique construction of mounting the washer onto 4 shock absorbers which stop the machine from severe vibration or moving from its original location.

SmartSeal™

- ASKO is the only machine not to have rubber bellows, which means no more cleaning of unsightly rubber seals. SmartSeal™ also makes the machine easier to load and unload as you don't have to drag the clothes through wet rubber bellows.

Steel Construction

- ASKO has reduced the use of plastic in our machines in favour of more durable steel. In addition to that, we quality test everything before it leaves our factory.

Stainless Steel inner and outer drums

- We use stainless steel on both drums quite simply because it is more durable. Secondly it is much more hygienic than plastic, which many of our competitors use.

T793C

Sensor condenser dryer

Models: T793CFI - Fully Integrated, depicted with TouchProof™ stainless steel door

T793CSS - TouchProof™ stainless steel door

T793CWH - White door

Programs:

- Auto Extra dry
- Auto Dry
- Auto Normal dry
- Auto Iron dry
- Timed drying 5 - 180 min
- Airing program 5 - 180 min

Options:

- Temperatures: low/normal
- Anti-crease: 60/120/180 min
- Garment cool down
- Delayed start: 1 - 24 hours

Capacity:

- 111 litre drum /6kg

Environment:

- 2 star energy rating
- All components marked for future recycling
- ISO14001-Environmentally Certified

Technology:

- SensiDry™
- Temperature sensor

Construction:

- Butterfly™: non-stop tumbling
- Drum in Stainless steel
- Ball bearing suspension
- Double lint filter
- Cleanable fan
- ISO 9001 - certified production

Convenience:

- Display with program information and remaining time indication
- Internal light
- Audible end signal

Safety:

- KidSafe™

DC7181

Drying Cabinet "The Internal Clothes Line"

Colour: White, titanium

Height: 184 cm

Programs:

- Normal 0 - 4 hours
- Medium 0 - 4 hours
- Low 0 - 4 hours

Capacity:

- Dehumidification capacity: 17.5 g/min
- Total drying length: 16 m
- Drying time, Normal, 120 min
- Airing capacity: 180 m³/h

Environment:

- Energy consumption:
Normal 0.8 kWh/kg
- Marked for recycling
- ISO 14001 certified production

Comfort:

- Folding hangers for extra room
- Slide out hangers make loading and unloading easy
- Shoe rack
- Door hanger
- Glove hanger
- Variable timer up to 4 hours
- Door can be hung left or right
- 1 metre of venting duct included

Please Note:

The drying cabinet is a vented product. Please read instruction manual before building any cabinetry.

The DuoPro™

The before and after dinner dishwasher

Imagine never having to wash up by hand again. Then think of the ASKO DuoPro™.

The before and after dinner dishwasher is here. With this combination you can wash just about anything. What you can't fit in one, you can fit in the other. For instance, the pre-dinner dishwasher has 38cm in the lower basket to take everything you used to have to wash by hand; saucepans, frying pans, large baking trays, casseroles and other large utensils.

While the after-dinner dishwasher has an extra 4cm in the top basket for your long-stemmed wine glasses and champagne flutes. Together they can take up to 22 place settings.

You couldn't wish for a better combination. And at 86cm high they complement today's trend in higher bench tops. You can also integrate the doors to match the rest of your kitchen cabinetry.

The ASKO DuoPro™ combination brings a new dimension to the kitchen.

D3730

D3730XL Fully Integrated

Depicted with Optional ASKO Door, can also have your own cabinetry door attached

Programs:

- Heavy wash
- Normal wash
- Delicate wash
