Superlight™

Architectural   LED Lighting

Welcome to the NEW GENERATION of Lighting

Superlight LED lighting products incorporate the latest world-leading technology with finest quality LED components to offer the best lighting solution for any project

This product guide details a few products from our range. For our full catalogue visit www.superled.com.au

Green Low-Energy Alternative

Superlight LED Lighting products use significantly less energy than traditional lighting technologies - meaning they are safer, cleaner and better for the earth's environment.
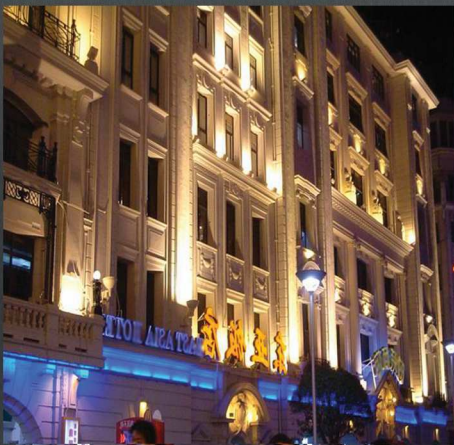

LED's also run much cooler than other light sources meaning there is less strain on air-conditioning systems. Superlight LED products produce ZERO IR or UV radiation.

Low-Maintenance Lighting Systems

In addition to running cleaner and saving on energy costs, LED lighting requires virtually no maintenance, meaning LED installations can actually put money back into your pocket!

Superlight LED products use finest quality LED components & have extreme life expectancy - in some cases up to 100 000 hours.

Wide Range of Applications

Recent advances in LED technology mean that LED's can now replace traditional lighting installations in any application.

The many advantages of Superlight LED products mean they are ideal for use in all residential, commercial & industrial projects.

RGB? - The 16 Million Colour Question?

LED systems are capable of producing rich, vibrant colours. Selected Superlight RGB LED products can be used in conjunction with a matching RGB controller for complete colour control.

Any single colour can be selected, or dynamic colour-changing animations & effects can be achieved.

We have a range of pre-programmed controllers available and can also assist with integrating LED installations into other systems such as Clipsal CBUS & Dynalite.

Single Colour Superstrip Ribbon

Suitable for indirect strip-lighting applications backlighting, cove & coffer lighting, edge-lighting signage, displays, pubs & clubs etc
cat no..7600-10

Warm White Superstrip Ribbon

Low-energy alternative to general striplighting, joinery lighting, cove lighting, edge-lighting, all archhitectural applications, colour temp: 3500K
cat no..7600-21

RGB Superstrip Ribbon

Full colour RGB Striplighting can display over 16 million defined colours, use with Superlight 5010 controller for full colour control
cat no..7600-35

High-Output RGB Modules

Full colour RGB Inter-connect 100mm modules, inc mounting track & jumper, wires use with 5010 controller for full colour control
cat no..7700-35

Recessed Inground S/Steel

Recessed LED uplight fitting with 316 marine-grade stainless steel trim. Several LED colours available, trim diameter - 175mm
cat no..3600-10

High Power Linear Wall Washer

Linear wall washer fitting for large scale illumination, single colour or RGB with DMX. Very high light output. 0.5mtr & 1.0mtr lengths
cat no..9100-10

High Power LED Floodlight

36W High power fitting for large scale illumination, available in white or RGB with DMX control. Very high light output - up to 40mtr throw!
cat no..9500-10

High Power RGB Projector

IP68 (submersible) marine-grade LED projector, 18W super bright array, suitable for high output outdoor & marine applications. RGB full colour.
cat no..9800-35

High Power Cree LED Strip

Very high output strip suitable for indirect lighting applications, replacement for fluorescent & other striplighting. Cool-white & warm-white
cat no..7500-10

LED MR16 Replacement Lamp

New generation LED lamp for std MR16 socket. Low-energy replacement, cool beam with zero IR or UV radiation. Cool-white & warm-white
cat no..2200-10

Regulated LED Power Supply

Reliable LED power supply suitable for driving Superlight LED products, various current ranges available. 12V & 24V DC Regulated.
cat no..3500-10

LED Flex Neon

LED flex-neon suitable for indoor or outdoor use. Many different applications, safe alternative to neon lighting. Several vibrant LED colours
cat no..7900-10

Flexible LED Ropelight

Decorative ropelight suitable for indoor/outdoor applications. Signage, decoration, temporary displays etc. All LED colours available
cat no..7200-10

High Power CREE Downlight

15W high-power LED downlight, adjustable suitable for commercial downlighting applications cool-white & warm-white. 1200 lumens!
cat no..2800-10

Square High Power Projector

Single colour or RGB LED projector/flood IP65 powerful LED output, suitable for large scale indoor and outdoor applications
cat no..9600-10

High Output LED Downlight

Low-energy alternative to halogen downlights for all residential & commercial projects. Centre-tilt adjustable. Available in cool-white & warm-white.
cat no..2900-10

Recessed LED Mini Lights IP68

Multi-purpose recessed LED fitting, machined 316 stainless steel, clear or frosted glass lens. Single LED colour or RGB. 32mm Trim Diameter
cat no..3200-10

Superflux 12V LED Module IP67

Multi-purpose LED module 38mmx38mm 12VDC, suitable for channel-letters, signage, backlighting, effect lighting. All LED colours available.
cat no..4200-10

Superlight Digital Tube/Screen

1000mm colour-tube suitable for bordering architecture, large outdoor decoration etc. can be programmed to display images & animation
cat no..7700-00

High Power RGB MR16 Module.

3x1W high-power LED module for architectural downlight & spotlight applications. Use with 5010 LED controller for full colour control.
cat no..2400-35

Bullet LED Mini Lights IP67

Multi-purpose recessed LED bullet, 29mm trim, 316 stainless steel, suitable for all architectural applications. Available in single colour & RGB
cat no..3300-10

Superlight RGB Controller

Controller for all 12V & 24V RGB products. on-board keys for function, select colour etc, also has DMX interface for remote control
cat no..5010-10
