Futurewood – Smartfence®

**Long life, low maintenance, pre-coloured, decorative fencing/
building material and timber replacement.**

Give yourself the peace of mind that comes with knowing your classy looking screen fence will require very little maintenance* for years and years. Compare the value of these Futurewood – Smartfence® features.

- Great value for money compared to painted/stained timber
- High class wood grain finish in six standard colours
- Fade resistant, retains it's look year after year
- Colour runs completely through the material, never needs painting
- 100% recyclable
- Can be painted if a specific colour match is required
- Extremely low maintenance
- Waterproof
- Rot proof
- Termite resistant
- Will not cup or crack
- Small scratches can be polished out
- High Tech, low density, light weight formulation
- UV stable, tested to suit Australian conditions
- 10 year limited warranty
- Standard 3.6 metre lengths
- Three standard widths (40mm, 65mm and 96mm)
- Custom sizes and profiles available to order, subject to certain conditions

*Futurewood® recommend that your Smartfence® is cleaned with soapy water approximately once per year to remove any grime that may build up.

reaching for a sustainable world

Futurewood – Smartfence® offers the illusion of a well finished timber board, but is a waterproof, timber replacement polymer, that is not produced from our global rainforests, like many fencing timbers.

Futurewood – Smartfence® eclipses traditional timber pickets and boards. The low maintenance finish of Smartfence® provides a space age alternative to rotting timbers and the arduous task of sanding, filling and painting/staining that traditional timber fences demand.

Smartfence® lets you enjoy the beauty, peace and solitude of your private space without the worry of time consuming and expensive maintenance.

Futurewood – Smartfence® is great for pool fencing, front fencing, masonry fence infills, screen fencing, gates, balconies, body corporate spaces, patios, gables, sun screens, outdoor furniture, shopfitting etc.

Smartfence® – the smart alternative to finished, decorative timber boards for use inside or outside the home.

Note: Futurewood – Smartfence® has specific installation requirements. Please refer to our website for a copy of our fixing guidelines.

► This deck in East Doncaster, Victoria, is fitted with 138mm wide CleverDeck Mahogany boards that were used to replace an old rotting timber deck. The owners also added a cream coloured powder coated steel balustrade and polycarbonate roof to create a wonderfully classy, maintenance free outdoor room.

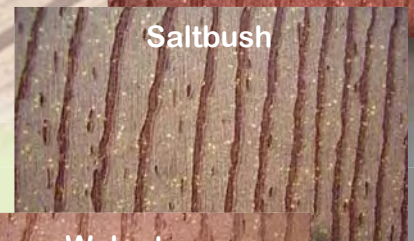

◄ These fashionable townhouses in Ringwood, Victoria, were fitted with 138mm Slate Grey CleverDeck boards in order to add an extra touch of sophistication to the finished product. The builder was also looking to avoid the risk of tannin bleed (that occurs with most hardwood decking) running from his first floor decks over his newly rendered and painted walls below and CleverDeck provided the perfect risk-free solution.

◄ This architect designed dwelling in Eaglemont, Victoria, was constructed using the finest materials, so CleverDeck 138mm wide Walnut boards were a natural choice for the outdoor entertaining area, shown here with an etched glass balustrade.
