

**A VERGOLA
WAY OF LIFE**

WELCOME

Award Winning Design

In an era where the choice in opening roofs is widespread, the Vergola Operable Louvre Roof remains unique and specialised.

The first of its kind and the only recipient of the prestigious Australian Design Award and Prince Philip Design Award, the Vergola Operable Louvre Roof provides a range of benefits which other opening roof systems and traditional roofing methods simply cannot match.

The Challenge

Creating an indoor outdoor area which is cool, comfortable and has a lovely open feel has always been a challenge. Having the right combination of ventilation, natural light and insulation from heat is vital in creating a comfortable atmosphere.

The functionality and versatility of the Vergola system provides a simple solution for what was once a difficult and challenging task.

Performance

The size, shape and raw material of the louvre are the basis of its unmatched performance.

The dual skin aerofoil shape is constructed from Colorbond steel. Colorbond steel is made by Australians for Australian conditions, and that means it's reliable anywhere, on the coast, or inland.

The size of the louvre ensures Vergola is the only system which can deliver a remarkably high level of 86% of natural light and 89% of free air flow.

Insulation

The insulation properties are one of the least recognized but one which play a vital role in creating that perfect environment.

The dual skin aerofoil shape as well as providing strength and durability, provides insulation from heat reducing thermal radiation with an air gap, keeping the protected area below much cooler than you could achieve with other solid extruded systems.

Design Options

With our standard range of Colorbond colours and the choices available in powdercoating we can deliver any colour combination to enhance your design.

A rain sensor which automatically closes your system in the event of rain will also re-open your Vergola when dry conditions prevail.

Remote controls or interfacing your Vergola with Smart Home or C-Bus Technologies is a simple, and fast becoming a standard task.

Our Commitment Is Your Guarantee

The Vergola system enjoys a reputation as being market leaders and continues to do so by a commitment to excellence in quality control and workmanship.

The finishing detail, seamless attachments and quality workmanship are second to none and are backed with Master Builder and product guarantees ensuring your peace of mind for many years to come.
