

TANDEMBOX intivo

Always different, always unique

Create distinctiveness and harmony

As customer tastes become more sophisticated; the desire to create individual, highly original designs increase. TANDEMBOX intivo brings endless new possibilities to inspire and stimulate.

TANDEMBOX intivo opens up new worlds of design possibilities for pullouts. Available colours terra black, silk white and stainless steel create a new quality of dialogue between exterior and interior furniture design.

BOXCOVER; for combining sophisticated design elements which bring you endless new possibilities to inspire and stimulate.

BOXCAP; for continuous design in silk white, stainless steel, or terra black.

Using the Design Configurator on our web site, you can try out different patterns in a virtual TANDEMBOX intivo pull-out. This enables you to see how the different patterns would look like in the finished pull-out. <http://myintivo.blum.com>

Effortless and completely versatile

TANDEMBOX intivo works in all applications including; standard pull-outs as well as individual solutions such as the unique SPACE CORNER, sink pull-out and waste storage. Inner pull-outs are also available behind doors or high fronted pull-outs - either with a front design element or with a dedicated cross rail.

Unsurpassed running action and ease of motion

TANDEMBOX intivo brings together enhanced design opportunities, superior quality of motion and unsurpassed running action - even up to loads of 65kg.

Gain exceptional opening comfort with the SERVO-DRIVE electrical opening support system. A gentle pull on the handle or a light touch on the front with hand, knee or hip is enough for TANDEMBOX intivo pull-outs to open smooth and effortlessly. And, thanks to BLUMOTION soft-closing technology TANDEMBOX intivo pull-outs close silently and with complete ease.

Frequently asked questions

? What is the maximum width that a TANDEMBOX intivo drawer can be made?

The maximum width for an internal drawer cabinet is 1200mm. We recommend external drawers be made no larger than 1500mm. The total weight of the drawer and contents must not exceed the maximum weight capacity of the runners.

Note: ORGA-LINE cross dividers can only be used in one piece in cabinets up to 1200mm wide.

? Can the dividers be moved in the pull-out?

Yes. TANDEMBOX intivo pull-outs have an optional adaptor profile which attaches under the BOXCAP or design element.

Adjustment is made by slightly pressing down evenly on the divider, move and release to lock.

Note: ORGA-LINE cross dividers for TANDEMBOX intivo have colour matched connecting ends.

? Is there a TIP-ON option for TANDEMBOX intivo?

Yes. TIP-ON is available for TANDEMBOX intivo, as an option where power is unavailable for SERVO-DRIVE.

Note: BLUMOTION soft close is not available with TIP-ON

? Can I use TANDEMBOX intivo in my outdoor/alfresco kitchen?

No. Due to the high potential of exposure to salt air, humidity and water Blum does not support this use and therefore the lifetime warranty would be void.

TANDEMBOX intivo can be used in other internal areas such as the bathroom, wardrobe and living room.
