trend[®] windows & doors

Create a welcoming ambience and sense of style in your home with Trend[®] quality aluminium windows and doors.

Choose from the largest, most comprehensive range in Australia with more design and performance features than ever before.

Trend[®] offers experience, quality and service that you can rely on. Trend[®] understands that choosing the right windows and doors for your home is critical, so here are some pointers to assist you.

Design and Style

Colour, style, size and shape of windows and doors enhance the charm and character of your home, both inside and out. Choosing the clean lines of aluminium, you can create exactly the look and feel you want for your home, with just the right amount of natural light.

Trend[®] Windows colour catalogue offers limitless options to ensure that you make the perfect choice.

Energy Efficiency

Enhancing the comfort of your home depends significantly on the amount of ventilation and insulation provided by your windows and doors. A cool breeze in summer is refreshing and staying warm in winter is essential. With Australia's diverse climate it is important to consider the best design options for your location and individual needs.

Trend[®] can offer advice on how to save money on energy costs by choosing the appropriate frame material, glass type and style for your particular climatic conditions.

Safety and Security

Your family needs to feel safe and secure, so it is essential to use locks and frames that will deter unwanted entry and select the right type of glass.

Trend[®] can assist you with these decisions as Trend[®] products adhere to the highest standards of safety and security.

Your Individual Needs

You may have specific needs, such as arches, glazing bars or bay windows – or a specific colour, glass or hardware.

Trend[®] provides you with complete design flexibility.

Quality and Durability

Windows and doors should be strong and well made, providing you with many years of effortless performance. All Trend[®] windows and doors carry the Australian Window performance label.

Trend[®] will inspire you with the options available and provide you with the expertise to create a perfect environment in your home.

Our membership of the Australian Window Association is your guarantee of performance.

strength, style, sophistication

Aluminium has always offered the advantage of durability and affordability. Now, Trend's latest range of Aluminium windows and doors sees this versatile material come of age - setting new benchmarks for style and performance.

You'll find the crisp, clean lines of Trend's contemporary aluminium the equal of timber when it comes to capturing just the right look or feeling. In fact, we offer the widest range in Australia. So, whatever type of home you're creating - traditional or modern - Trend® Aluminium windows and doors are the perfect solution for your needs making it simple to add the essential sense, light and space that has become the hallmark of the classic Australian home.

And when it comes to practicalities you'll find everything you expect from aluminium and more.

Everything from energy efficiency to security is enhanced by the latest thinking in frames, glazing and hardware.

If you don't see exactly what you want in this catalogue simply ask us to make it for you. As Australia's largest window and door company with nine factories we can custom make any design - adding your personal touch in choice of colours, glazing or hardware. Also feel free to ask our advice about energy efficiency, acoustics or specific climate requirements and see why Trend® aluminium windows and doors have set a new trends in strength, style and sustainability.

classic perspectives

Trend® Double Hung Windows offer a timeless elegance equally at home in contemporary dwellings as in more traditional houses.

The flexible design lets you adjust airflow to the season and your frame of mind. Open the top, the bottom or both sashes. Interlocking top and bottom sashes also provide added strength and security.

All with the benefits of aluminium, low maintenance, durability and a broad choice of powder-coated finishes. You can also create that timber look and feel by combining classic round profile Ovolo colonial bars or horns with wide style sashes.

features & benefits

- 1 **Energy Efficiency Options**
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 3.6 and SHGC 0.33 are available for Trend® Double Hung window.
- 2 **Acoustic Options**
SoundMizer® acoustic solutions in various STC ratings, are available to STC 31 for Trend® Double Hung window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 **Key locks**
All Trend® Wide Style Double Hung Windows are available with optional key lock that can be keyed to match other Trend® aluminium windows. Vent locks are available for Trend® Double Hung Windows.
- 4 **Complementary Accessories**
 - 180° non-load bearing couplers, two types available for added mullion strength when required.
 - 135° & 90° non-load-bearing corner couplers to suit bay and kitchen windows.
 - 100mm aluminium architraves for replacement window installations.
 - Adjustable aluminium storm mould.
 - Aluminium 180° and 90° mullion covers to hide load-bearing posts.
- 5 **Interlocking Meeting Rails**
The interlocking meeting rails on the sashes combine together when closed to improve the overall weather performance strength. The sashes by-pass to facilitate easy internal glass cleaning.
6. **Weather Sealed for Full Protection**
All sashes are fitted with weatherpile seals to keep the dust and water where they belong, on the outside.
- 7 **Options**
Colonial Bar and Federation Bar Layouts are available. Easy to fit flyscreens. Wide range of powdercoat finishes.

awning windows

light and easy

Trend® Awning windows epitomise the easy living Australian way of life. Maximising space and light with contemporary, clean designs.

Awning windows are great for creating a sense of size, letting you create a broad expanse of glass that makes the most of natural surroundings.

For a more classic look consider the Ovolo round sash bar profile – it's perfect for traditional style homes.

On a practical level, the optional high quality stainless steel chain winder stop windows slamming, while the hood protects against the elements.

features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 3.5 and SHGC 0.39 are available for Trend® Awning window.
- 2 Acoustic Options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 39 for Trend® Awning window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 Optional Key Lock Chain Winder
Trend® Awning Window winder mechanism is designed specifically for high performance, security and reliability. With a Polesium™ cover and base combined with a stainless steel chain as standard for long life and reliability, the winder can be used in even the harshest environment without the worry of corrosion. The robust mechanisms are mounted securely to the window with a concealed 2 point fixing. Keyed lock is standard for added security.
- 4 Continuous Hinge Hood
The sash is protected from the weather by a continuous hinge hood that supports the sash and keeps the rain where it belongs - on the outside.
- 5 Weather Protection
The tubular splayed sash, with self-draining trough, assists the continuous surround bulb seal to protect against even the most adverse weather conditions.
- 6 Sash Corner Protection
The bottom rail sash corners are protected by a custom nylon cover that acts as a sash guide into the frame.
- 7 Glazing
Trend® sash is available in special laminates for energy efficiency applications. Acoustic solutions are also available to high STC ratings.
- 8 Complementary Accessories
 - 180° non-load bearing couplers, two types available for added mullion strength when required.
 - 135° & 90° non-load-bearing corner couplers to suit bay and kitchen windows.
 - 100mm aluminium architraves for replacement window installations.
 - Adjustable aluminium storm mould.
 - Aluminium 180° and 90° mullion covers to hide load-bearing posts.
- 9 Options
Easy to fit tension loaded flyscreens can be fitted and removed from the inside. Wide range of powdercoat finishes available.

NOTE:

Window Placement
Care should be taken with locating opening awning windows in pedestrian traffic areas.

casement windows

refresh your view

Trend[®] casement windows are a classic design, bringing character and romance to any home.

Their strong angular lines overcome that boxy feeling and are great at capturing cooling summer breezes.

Our durable, lever operated cam catch ensures everything closes securely and you can also order specially designed fly screens.

On a practical level the outside of each window can easily be cleaned from the inside with a full ninety degree opening.

For areas other than Queensland please refer to Quantum Casement on page 74

QLD - features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 3.5 and SHGC 0.39 are available for Casement window.
- 2 Acoustic Options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 39 for Casement window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems.
For information or technical details contact Trend®.
- 3 Trend® Aluminium Casement windows carries standard casement hardware.
- 4 Sashes are fitted with stainless steel stays which allow the sash to move away from the window jamb, making it possible to clean the outside face of the glass from within the building.
- 5 The sash perimeter is fitted with a PVC bulb seal ensuring a full weather tight seal against the elements. (Ideal for thermal or sound control).
- 6 Complementary Accessories
 - 180° non-load-bearing couplers, two types for added mullion strength when required.
 - 135° & 90° non-load-bearing corner couplers to suit bay and kitchen windows.
 - 66mm and 100mm aluminium architraves for replacement window installations.
 - Adjustable aluminium storm mould.
 - Extruded aluminium 180° mullion covers to hide load-bearing posts.

NOTE:

Window Placement
Care should be taken with locating opening awning windows in pedestrian traffic areas.

ordering details

sliding window

smooth living

Trend® sliding windows are perfect for capturing that special view or garden outlook.

They create a clean uncluttered look that opens the room up so you can enjoy that indoor - outdoor feeling that makes the most of warm summer evenings or winter sun.

The extra durable rollers ensure the aluminium frames always glide smooth and true.

While optional ventilation key locks allow you to lock the windows partially open to catch cooling breezes.

features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 3.5 and SHGC 0.42 are available for Trend® Sliding Window.
- 2 Acoustic Options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 36 for Trend® Sliding Window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems.
For information or technical details contact Trend®.
- 3 Key Locks
Trend® Sliding windows are available with the award winning key lock cam handle as standard or with optional Trend® ventlock.
- 4 Complementary Accessories
 - 180° non-load bearing couplers, two types available for added mullion strength when required.
 - 135° & 90° non-load-bearing corner couplers to suit bay and kitchen windows.
 - 100mm aluminium architraves for replacement window installations.
 - Adjustable aluminium storm mould.
 - Extruded aluminium 180° and 90° mullion covers to hide load-bearing posts.
- 5 Removable Fixed Sash
The fixed sash on sliding windows is removable to enable windows to be re-handled on site. Additionally, if the window is broken in the future, it is possible to remove the sash and be taken to a glazier for repair, thereby saving an expensive site visit.
- 6 Glazing
Sash glass is protected by a full wrap-around glazing channel. As the window can be re-glazed from inside the building, there is no need for expensive scaffolding if you break the glass on a Trend® Sliding Window. Double Glazing is available for energy efficiency requirements.
- 7 Sill Baffle
The Trend® Sliding Window has an external full width sill baffle covering drainage outlets, thereby reducing infiltration of dust and drafts.
- 8 Sash Rollers
Sash rollers are height adjustable and sashes glide effortlessly on graphite impregnated rollers. Also available double bogey adjustable roller for heavy sashes or double glazing.
- 9 Weathershield Fin
The weathershield fin prevents metal to metal contact in the operation of sliding sashes, resulting in a reduction of air and dust penetration.
- 10 Options
Colonial Bar and Federation Bar Layouts are available.
Easy to fit flyscreens.
Wide range of powdercoat finishes.

bay windows

bay with a view

A bay window adds distinctive charm and character to bedrooms or living areas, helping make the most of views - creating sun filled reading nooks for winter or cool shady relaxing spaces in summer.

An individual touch that sets your house apart from the crowd.

With this in mind, you can design your bay window around any combination of Trend® windows.

It's your home - the choice is up to you.

standard double hung bay windows

ordering details

All windows are illustrated as viewed from outside. Codes shown are for plain windows. Manufactured from 64mm aluminium extrusion. The first two numbers of code indicate approximate height. The last two numbers of code indicate approximate centre size of bay window.

For Colonial bar layout place CL at the end of the code. For Federation bar layout place FED at the end of the code. ABOD indicates Aluminium Ovolo Bay Double Hung.

T after the size indicates a Transom.
/6 indicates 600mm wings.
/7 indicates 724mm wing option.

Note:

The illustration above is a representative range of bay windows. Bays can be manufactured to all standard heights and widths. Other options include keyed locking catches, aluminium flyscreens, custom built frames to your design.

louvres

adjust to a change in climate

Louvres are the latest in window style!

An architectural renaissance born from the recognition that louvres not only look cool they are cool – offering superior flow through ventilation. In this climate of change Trend[®] has introduced a new generation louvre design featuring improved sealing and durability.

Trend[®] Louvres give a super tight weather-proof seal setting new standards for this contemporary classic. Blades come in glass, timber or metal and can be installed as a single frame or in combination with doors or windows.

features & benefits

- 1 **Energy Efficiency Options**
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 4.2 and SHGC 0.33 are available for Trend® Louvre window.
- 2 **Acoustic Options**
SoundMizer® acoustic solutions in various STC ratings, are available to STC 23 for Trend® Louvre window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 **Mechanics**
Clever combination of T shaped aluminium bars and high strength acetal bearing has resulted in strong, non-corrosive operation, that extends the life of the louvre beyond the most stringent standard tests levels.
- 4 **High Performance**
Newly developed patented innovations, improve dramatically, the Trend® Louvres water and weather resistance. One of

these innovations, the unique “living hinge”, ensures an extremely firm fit between the louvre clips and the channel to resist water and air leakage. The overlapping shroud device on each clip creates a water-resistant seal between the clips. In extreme weather conditions the patented primary and secondary drainage channels, hidden within the clips, manage any water to the outside of the building.

- 5 **Handles**
Ergonomic curved handle is standard and is available in 25 different colours. Optional “O” ring handle is available for high up, out of reach applications. Low profile handle for door insertion applications is also available as an option, as is Handle Locking Bar for easier opening for ergonomic situations, i.e. retirement homes. Handles can be placed left or right, up high, or down low.
- 6 **Security**
Keyed lock is available as an option for applications where security is paramount, as is Security Bars to fit standard blade widths (Breezway 130mm Easy Frame louvre only).

- 7 **Glazing**
Louvre Blades are available in 152mm or 102mm height, 6mm toughened glass for strength and safety. Also blades are available in timber, aluminium or high performance extended warranty aluminium including photo image timber look. Trend® Louvre window, are one of the tightest sealing louvres on the market as well as high performing. Use of laminated glass is not recommended.
- 8 **Options**
Timber and Aluminium Blades. Select colour matching clips and handles to further enhance the Trend® Louvre Window. Frosted, etched or tinted toughened glass. “O” Ring Handle for high applications, Low Profile Handle and Handle Locking Bar. Keyed Locks and Security Bars. Insect Screens. Wide range of powdercoat finishes available including timber powdercoat finishes.

ordering details

All windows are illustrated as viewed from outside. Codes shown are for plain windows.

When using 130mm frame, minimum recommended reveals size is 135mm

Flyscreens can be readily fitted on the Trend® 130mm Surround Frame.

Blade thickness must be 6mm. Use of laminated glass for Trend® Louvres is not recommended

Select Colour matching clips and handles to further enhance the Trend® Louvre window

Keylock is optional

The first two numbers of code indicate approximate height, the last two numbers indicate approximate width

Maximum width for:

Single bank Louvres is 1002mm
Double bank louvres is 1982mm
Triple bank louvre is 2959mm
Four bank louvre is 3940mm
Five bank louvre is 4918mm

General:

When not using Weatherstip overall height will be reduced by 10mm

Note:

Louvre blades are available in Western Red Cedar, Aluminium or Toughened Glass

Ask your Trend® Sales Representative for more information.

Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 3.0 and SHGC 0.41 are available for Trend® Sliding Door.
- 2 Acoustic Options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 38 for Trend® Sliding Door. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems.
For information or technical details contact Trend®.
- 3 Locks
Sliding doors are fitted standard with locks and can be upgraded to an optional D handle.
- 4 Safety Glazing
Toughened Safety A Grade Glass with a visual motif at the mid point to provide added safety. Laminated Glass is used in all non standard door sizes. Glass sits into the extrusion door glazing pocket up to 13mm. Double Glazing is available for energy efficiency requirements.
- 5 Protected Rolling Track
An extruded aluminium splayed threshold protects both glass door and flydoor rolling tracks.
- 6 Simple Access
The aluminium threshold features the Easyrider™ sill which is ideal for wheelchair access.
- 7 Heavy Duty Rollers
Trend® door uses a heavy duty roller system for smooth operation. Glass door panels roll on heavy duty adjustable acetel wheels, that are perfectly matched to the sill rail to ensure efficient running. The marine alloy aluminium carriage reduces the chance of corrosion ensuring a long and smooth operation.
- 8 Frames
Trend® Door frame is 101.6mm wide with standard locks. The sash has aesthetically pleasing lines and a smooth rounded profile that has a truly solid look.

Maximum Door Height is 2400mm
Maximum Panel Width is 1500mm
Maximum Door Width is 6010mm
- 9 Interlockers
Three types of interlockers are available depending on the structural pascal ratings. Trend® Sliding Door ultimate structural rating is 1500 pascals (kPa).
- 10 Optional Heavy Duty Barrier and Insect Screen Door
The sturdy extruded aluminium, external sliding flydoor is fitted with spring loaded acetel wheels that ensure the insect screen door stays on the track and opens smoothly.
- 11 Complementary Accessories
 - 180° non-load-bearing couplers.
 - 135° non-load-bearing corner couplers.
 - 100mm aluminium architraves for replacement door installations.
 - Adjustable aluminium storm mould.
 - Extruded aluminium 180° mullion covers to hide load-bearing posts.

- 12 Options
Colonial Bar, Federation Bar Layouts and Ovolo adaptor are available.
Easy to fit flyscreens.
Wide range of powdercoat finishes including Timber finishes available.

ordering details

All doors are illustrated as viewed from outside. Codes shown are for plain doors. The first two numbers of code indicate approximate height, the last two numbers indicate approximate width.

Sash Style Options:

Standard option is:
Eg door code TXD2018
O indicates ovolo sash style.
Eg door code TOXD2018

alfresco stacker & corner stacker doors

a more perceptive perspective

Trend[®] Alfresco Stacker Doors slide-away to give a completely open air feeling. They're a great way to give your home a modern alfresco look - you can design stylish outdoor indoor rooms that suit the way you want to live.

Flexible formats and sizes give you a two thirds opening for easy access to balconies or patios.

Corner stacker doors will open up a courtyard and create a sophisticated outlook.

Quality fittings ensure they always glide smoothly while aluminium construction guarantees the good looks last.

features & benefits

hinged doors

Optional ovolo colonial style shown

make an entry

Trend® knows doors inside out. More than just a means to an end, the right door will transform the flow of a room or an entire house, bringing the outdoors in and making the most of available space.

Whether you're looking for a traditional frame, something more contemporary or classic French doors, we'll help you find exactly the right design to suit the character of your home.

Combinations of glass and/or aluminium raised or flat panels can be combined with any door to make a grand statement or simply let the sun shine in. Ovolo colonial style small pane glass panels can be added - giving you a timeless timber look with all the durability and strength of aluminium.

All our aluminium doors are available in a range of powder coated and timber grain finishes and glass options can be specified as required.

features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 4.2 and SHGC 0.27 are available for Trend® Provincial Hinged Door.
- 2 Acoustic Options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 35 for Trend® Provincial Hinged Door. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 Safety Glazing
Toughened Safety A Grade Glass with a visual motif at the mid point to provide added safety. Laminated Glass is used in all non standard door sizes. Double Glazing is available for energy efficiency requirements.
- 4 Locks
Standard patio deadlock is fitted for security. Optional three point locking is also available.
- 5 Hinges
The door is hung on special offset fast-fix hinges to eliminate binding. The door can also be supplied with Parliament hinges where the door is to swing out flush to brickwork.
- 6 Direction of Opening
The door can be ordered as open in or open out.
- 7 Drained Sill
Standard on the door is the fully drained sill to improve the weathering on the door.
- 8 Matching Sidelites
Matching sidelites in the style of the swing doors are available as an option to Trend® Provincial Hinged Doors, as well as highlites, arches or other options.
- 9 Timber Entrance Door
Where there is the need for a Timber Entrance Door, the frame can

accommodate a 40mm Exterior Timber Door in either open out or open in with the drained sill.

- 10 Options
Flyscreen door is available. Colonial Bar and Federation Bar Layouts are available in Trend® Ovolo system. Wide range of powdercoat finishes including timber finishes available.

entry frames

first in-first impressions

They say you never get a second chance to make a first impression.

Trend® Entry Frames are all about creating a lasting first impression. Elegantly grand or stylishly minimalist, contemporary or traditional.

Whatever your preference, we'll help you create something special. Something that's more than just a front entry.

quantum xp[®] quality speaks for itself

Quantum XP[®] windows and doors open a new era in aluminium.

The patented Van Door sealing system helps create superior levels of quality, durability and practicality. Major improvements in thermal insulation, reduce heating and cooling costs and at the same time minimise dust, condensation and noise.

Quantum XP[®] also gives aluminium a fresh aesthetic look – the 55mm sash enhances the clean lines of contemporary homes and gives the solid feel of timber in more traditional homes.

The Quantum range has the flexibility to suit all types of building design. The robust high end features mean Quantum windows and doors can be confidently used in the harshest cold, marine, desert or tropical environments.

So take a fresh look at aluminium and build Quantum XP[®] quality into your home.

awning windows

eye to the future

When you're looking for quality and style make sure you're looking out at the world through Quantum XP® Awning Windows.

Maximising space and light with contemporary, clean designs awning windows are great for creating a sense of size. Perfect for showing off the view.

On a practical level, high quality optional stainless steel chain winders stop windows slamming, while the hood protects against the elements.

features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 4.0 and SHGC 0.37 are available for Quantum XP® Awning window.
- 2 Acoustic options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 39 for Quantum XP® Awning window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 Key Lock Chain Winder
Quantum XP® Awning window winder mechanism is designed specifically for high performance, security and reliability. With a Polesium™ cover and base combined with a stainless steel chain for long life and reliability, the XP winder can be used in even the harshest environment without worry of corrosion. The robust mechanisms are mounted securely to the window with a concealed 4 point fixing.

Keyed lock is standard for added security.
- 4 Continuous Hinge Hood
The sash is protected from the weather by a continuous hinge hood that supports the sash and keeps the rain where it belongs on the outside.
- 5 Glazing
Quantum XP® Premium sash is also available in 16mm double glazing for energy efficiency applications. Acoustic solutions are also available to high STC ratings.
- 6 Frames
Quantum XP® Awning Premium frame is 65mm with the window sash 55mm wide. Quantum XP® has a truly solid look, reminiscent of timber, and is extremely popular in both traditional and contemporary house designs.
- 7 Window Placement
Care should be taken with locating opening awning windows in pedestrian traffic areas.
- 8 Protective Wrapping
Protective wrapping for delivery to site is a standard for all Quantum XP® products.
- 9 Options
Easy to fit flyscreens can be fitted and removed from the inside. Wide range of powdercoat finishes available including timber powdercoat finishes.

notes

Hinged across the top, the sash of the Quantum XP[®] awning windows swings out from the bottom, giving your home good ventilation – even in wet weather. The sash design offers a wide viewing area, while its excellent sealing qualities ensure added climate control.

In gusty conditions, the sturdy chain winder mechanism prevents the window slamming.

* Also available in Colonial and Federation Bar styles.

The opposite page are window codes for Quantum XP[®] Premium products (55mm sash). For information on double-glazing or wind ratings, please contact Trend[®] Windows & Doors Sales Representative.

casement windows

make a statement

If you're planning to make a bold statement, Quantum XP® Casement windows may be precisely what you're looking for.

Their classic design brings character and romance to any home. Strong angular lines created by the premium 55mm sash gives a solid feel reminiscent of timber with all the strength and practicality of top quality aluminium.

features & benefits

- 1 Energy Efficiency Options
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 5.9 and SHGC 0.25 are available for Quantum XP® Casement window.
- 2 Acoustic options
SoundMizer® acoustic solutions in various STC ratings, are available to STC 39 for Quantum XP® Casement window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 3 Operator
Quantum XP® Windows foldaway operator mechanism is designed for ease of operation and folds neatly into the housing when not in use. The arms are solid die-cast metal and the housing is coated in E-gard (Multi stage coating process that produces a greater, more durable finish). The robust mechanism is mounted securely to the window with concealed 6 point fixing. Operating handle is available in black or white only. Stainless steel arms are optional.
- 4 Side Sash Latch
Handle is operated by a 180° rotation from open to closed position and is concealed within the window frame. Operation pulls in sash for a tighter seal against the weather and improved security. Side sash latch is available in black or white only.
- 5 Opening
Casement allows a 90° opening for a wider viewing area and excellent ventilation control. The 90° opening makes it convenient for cleaning both sides of the sash.
- 6 Glazing
Quantum XP® Premium sash frames are available in 16mm double glazing for energy efficiency applications. Acoustic solutions are also available to high STC ratings.
- 7 Frame
Quantum XP® Casement frame is 65mm wide with a 55mm wide sash for greater strength and security. The sash has aesthetically pleasing lines and a smooth rounded profile that has a truly solid look. Reminiscent of timber, Quantum XP® Casement is extremely popular in both traditional and contemporary house designs.
 - Wind structurally rated to 1500Pa
 - Water pascals rated to 450Pa
 - Maximum sash height is 2035mm (Max height 2100)*
 - Maximum sash width is 850mm
 - Maximum sash width is 720mm for casement heights between 1800mm and 2035mm*
- 8 Window Placement
Care should be taken when locating opening casement windows in pedestrian traffic areas.
- 9 Protective Wrapping
Protective wrapping for delivery to site is a standard for all Quantum XP® products.
- 10 Options
Stainless steel hardware upgrade available.
Easy to fit flyscreens that can be removed from the inside.
Wide range of powdercoat finishes available including timber powdercoat finishes.
Also available in Colonial, Federation and Ovolo styles.

The aluminium threshold features the Easyrider™ sill which is ideal for wheelchair access.
- 7 Heavy Duty Rollers
Quantum door uses a heavy duty, double bogey roller system for smooth operation. The marine alloy aluminium carriage reduces the chance of corrosion ensuring a long and smooth operation.
- 8 Frames
Quantum Door frame is 101.6mm wide with the sash 50mm wide. Reminiscent of timber, Quantum Sliding Stacker Door is extremely popular in both traditional and contemporary house designs.

Maximum Door Height is 2700mm
Maximum Door Width is 4473mm (up to 3 panel door)
Maximum Door Width is 6390mm (up to 6 panel door)
- 9 Interlockers
Five types of interlockers are available. Quantum Door rates to 2200 pascals (kPa) - structural.
- 10 Optional Heavy Duty Barrier and Insect Screen Door
The sturdy extruded aluminium, external sliding flydoor is fitted with spring loaded acetal wheels that ensure the insect screen door stays on the track and opens smoothly.
- 11 Build-In Accessories
 - 180° non-load-bearing couplers.
 - 135° non-load-bearing corner couplers.
 - 100mm aluminium architraves for replacement door installations.
 - Adjustable aluminium storm mould.
 - Extruded aluminium 180° mullion covers to hide load-bearing posts.
- 12 Security
Quantum Sliding Stacker Door has a double parrot beak with a 2 point locking system. Striker plate is mounted with full fixing to jamb for added security.
- 13 Protective Wrapping
Protective wrapping for delivery to site is optional for all Quantum Sliding Stacker Door product.
- 14 Options
Colonial Bar, Federation Bar Layouts and Ovolo adaptor are available. Wide range of powdercoat finishes including timber finishes available.

Door heights not available in all wind pascal ratings. For information on double-glazing, different glass types or wind ratings, please contact a Trend® Windows & Doors sales representative.

* Also available in Colonial, Federation and Ovolo design styles.

xtreme[®] quality for climate xtremes

We live in a changing world. Due to bushfires our living environment is becoming more extreme. In fact many homes lost to bush fires actually survive the main fire, only to fall victim to embers floating through shattered windows or doors.

That's why Trend has developed the Xtreme[®] range of aluminium windows and doors. They take the top quality Quantum range a step further – changing the design to protect Australian homes against the extremes of nature.

Featuring Pyro-Protec Seals with 5mm toughened glass, Xtreme[®] window systems are designed to withstand up to 40kw/m² of heat flux (CSIRO tested).

These are combined with our patented Van Door system which is a crucial element in helping a house survive a bushfire.

Xtreme[®] Windows & Doors are compliant to Section 8 Construction Service Bushfire Attack Level 40 (BAL-40), Radiant Heat Level 40kW/m², AS3959 (2009). For full details of Standards requirements for individual products please refer to Trend[®] Windows & Doors Technical Department.

It's a hard world out there - use Xtreme[®] to help your home tough it out.

awning windows

stylish protection

Xtreme[®] awning windows help make the most of Australia's beautiful natural environment while protecting you from it at the same time.

Awning windows capture the breeze and give you plenty of space and light. Should the worst happen, close them up tight and they'll play a major part in helping your home survive.

Featuring Pyro-Protect™ Sealing and 5mm toughened glass, these windows are designed to withstand up to 40kw/m² of heat flux (CSIRO tested) – equivalent to an extreme bush fire, to help keep the house sealed against smoke and embers.

features & benefits

- 1 **Bushfire Features**
Xtreme® Bushfire Windows & Doors have been tested to withstand temperatures up to 40kWm² without failure from either the glazing or from the window system itself, to help prevent internal ignition of houses and loss of precious possessions.
- 2 **Xtreme® Bushfire Windows & Doors System**
Features include patented Van Door® and Pyro-Protect™ Sealing Systems acting to protect the home against wind, water, noise dust and bushfire penetration. Trend® has combined the technologically advanced Quantum XP® Windows system with Pyro-Protect™ seals, glazing systems and 5mm standard toughened glass to produce Xtreme® Windows and Doors.
- 3 **Energy Efficiency Options**
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 4.4 and SHGC 0.42 are available for Xtreme® Awning window.
- 4 **Acoustic options**
SoundMizer® acoustic solutions in various STC ratings, are available to STC 31 for Xtreme® Bushfire Awning window. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 5 **Key Lock Chain Winder**
Xtreme® Windows winder mechanism is designed specifically for high performance, security and reliability. With a Polesium™ cover and base can be combined with a stainless steel chain for long life and reliability, the XP winder can be used in even the harshest environment without worry of corrosion. The robust mechanisms are mounted securely to the window with a concealed 4 point fixing. Keyed lock is standard for added security.
- 6 **Continuous Hinge Hood**
The sash is protected from the weather by a continuous hinge hood that supports the sash and keeps the rain where it belongs - on the outside.
- 7 **Glazing**
Xtreme® Premium Awning sash frames have 5mm toughened glass as standard and is available in 6mm single and 16mm double glazing for energy efficiency applications. Acoustic solutions are also available to high STC ratings.
- 8 **Frames**
Xtreme® Bushfire Windows & Doors Premium frame is 65mm with the window sash 55mm wide. Xtreme® has a truly solid look, reminiscent of timber, and is extremely popular in both traditional and contemporary house designs.
- 9 **Window Placement**
Care should be taken with locating opening awning windows in pedestrian traffic areas.
- 10 **Protective Wrapping**
Protective wrapping for delivery to site is a standard for all Xtreme® products.
- 11 **Options**
Easy to fit flyscreens can be fitted and removed from the inside. Wide range of powdercoat finishes available including timber powdercoat finishes.

*Xtreme® Windows & Doors are compliant to Section 8 Construction Service Bushfire Attack Level 40 (BAL-40), Radiant Heat Level 40kW/m², AS3959 (2009). For full details of Standards requirements for individual products please refer to Trend Windows & Doors Technical Department.

features & benefits

- 1 **Bushfire Features**
Xtreme® Bushfire Windows & Doors have been tested to withstand temperatures up to 40kW/m² without failure from either the glazing or from the window system itself, to help prevent internal ignition of houses and loss of precious possessions.
- 2 **Xtreme® Bushfire Windows & Doors System**
Features include Pyro-Protect™ Sealing Systems acting to protect the home against wind, water, noise dust and bushfire penetration. Trend® has combined the technologically advanced Quantum Windows® system with Pyro-Protect™ glazing seal system with 6mm standard toughened glass to produce Xtreme® Bifold Doors.
- 3 **Energy Efficiency Options**
Trend® Thermashield® in various glazing styles are available to help reduce energy consumption. Trend® Thermashield® means greater control, bigger savings and most importantly one less thing to worry about. Energy efficient options to u-value of 4.0 and SHGC 0.52 are available for Trend® Xtreme® Bifold Door.
- 4 **Acoustic options**
SoundMizer® acoustic solutions in various STC ratings, are available to STC 27 for Trend® Xtreme® Bifold Door. SoundMizer® acoustic solutions can reduce aircraft, highway traffic, railway and other annoying noise problems. For information or technical details contact Trend®.
- 5 **Door Hardware**
Stainless steel hardware is provided as standard. Door hardware, hinges and drop bolts are available in three finishes, stainless steel, gold and black powder coat.
- 6 **Safety Glazing**
Toughened Safety A Grade Glass with a visual motif at the mid point to provide added safety. Double Glazing is available for energy efficiency requirements.
- 7 **Frames**
The weight of the bifold doors must be considered in the structural beam calculation of the overall structure. The bifold door and frame are not structural elements and the head of the frame should be attached to the structural beam.
- 8 **Protective Wrapping**
Protective wrapping for delivery to site is a standard for all Xtreme® products.
- 9 **Options**
Wide range of powdercoat finishes including Timber finishes available.

Maximum Frame Height is 2400mm
Maximum Frame Width is 6065mm
Maximum Door Leaf Size is 870mm
Maximum Weight in one direction is 180kg

NOTE: Available open out only.

*Xtreme® Windows & Doors are compliant to Section 8 Construction Service Bushfire Attack Level 40 (BAL-40), Radiant Heat Level 40kW/m², AS3959 (2009). For full details of Standards requirements for individual products please refer to Trend Windows & Doors Technical Department.

ordering details

All doors are illustrated as viewed from outside. Codes shown are for plain windows.

The first two numbers of code indicate approximate height, the last two numbers indicate approximate width.

Sash Style Options:
E indicates Xtreme sash style.
Eg door code ABF2214/2LE

Configuration Options:
Configuration is shown at the end of the code.
Eg door code ABF2220/1L2R (1Left, 2Right)

notes

The weight of the bifold doors must be considered in the structural beam calculation of the overall structure.

The bifold door and frame are not structural elements and the head of the frame should be attached to the structural beam.

Available open out only.

Maximum frame height 2400mm.
Max door leaf size 870mm.
Max frame width is 6062mm.
Max weight in one direction 180kg.

crestlite®

commercial breakthrough

As Australia's largest supplier of windows and doors with nine factories across the country Trend® is uniquely positioned to offer complete façade systems for shopfronts, factories, high rises and speciality residential projects with its Crestlite® range.

Trend® Crestlite® offers top quality aluminium commercial framing custom built to your design. Specialities include large area glazing solutions - emphasising thermal efficiency to reduce building running costs.

While employee and customer safety is ensured with the latest EH&S policies followed to the letter.

Trend® Crestlite® can provide a total solution from design through to installation and certification. No job is too small and everything we do meets AS3900 quality specifications.

Simply give us a call to discuss your ideas.

crestlite[®]

commercial & semi commercial

The Crestlite® range of products features commercial and semi commercial windows and doors for residential, shopfront, factories, high-rise and apartments.

Crestlite® offset frames can have any of the Trend® range of operable windows inserted into the frame in either single or double-glazed.

The Trend® Commercial division specialises in offering a complete facade system, supply, installation and certification. Trend® has the capacity and experience

to offer all aluminium glazing, glass and aluminium louvres and toughened glass assemblies.

Trend® operates with a quality system equal to AS3900 and recognises the need to prepare project specific quality plans as well as maintaining up to date EH&S policies in accordance with the required industry codes of practice.

For further information on Crestlite® products, contact your local Trend® sales office.

thermashield®

energy efficiency

All Trend® Windows & Doors products in the Thermashield® range are rated to WERS (Windows Energy Rating Scheme) which is approved by The AFRC (Australian Fenestration Rating Council) the only recognised body in Australia for energy rating windows and doors.

The NFRC (National Fenestration Rating Council) also recognises the above ratings when determining energy requirements.

Member #M0418

putting energy efficiency first ...

The only thing predictable about the weather is that it can and will exert an impact on your comfort and lifestyle.

When it comes to battling the heat and cold, energy efficient double glazing and low-e glass can offer significant savings by reducing expensive energy bills. When it comes to reducing carbon footprints and helping create a better environment, you cannot go past Trend® Windows & Doors Thermashield®.

Windows and doors which utilise the technologically advanced properties of the Thermashield® system offer a much more precise way to shield yourself and others from weather extremes.

Thermashield® also makes it easy for you to evaluate the level of protection you require for each specific window and door, and to choose accordingly. In turn, this translates into cost savings by reducing heating and cooling bills.

All Trend® Windows & Doors products in the Thermashield® range are rated to WERS (Windows Energy Rating Scheme) which is approved by The AFRC (Australian Fenestration Rating Council) the only recognised body in Australia for energy rating windows and doors.

The NFRC (National Fenestration Rating Council) also recognises the above ratings when determining energy requirements.

Thermashield® means greater control, bigger savings and, most importantly, one less thing to worry about.

Thermashield® putting CLIMATE CONTROL together

Find out more today.

energy efficiency starts at home

To get the best energy savings and the most comfort, different windows and doors are required for different climates.

For simplicity's sake, these are:

Cold climates, where the largest energy load is in heating the home. Melbourne, Hobart, Tamworth and Canberra are typical cold climates.

Hot climates, where the largest energy load is in cooling the home. Brisbane, Cairns and Darwin are typical hot climates.

Mixed climates, where the energy load is similar for heating and cooling. Sydney, Adelaide and Perth are typical mixed climates.

In order to make the best choice of window or door for your home, you also need to weigh up factors like u-Value and SHGC. Air Infiltration is also important to think about when considering windows and doors, as this is a major source of heat gain and loss. The lower the u-Value, the more effective it is at preventing heat transfer (in or out) of a window. The u-Value is a measure of the rate of non-solar heat loss or gain through any given product.

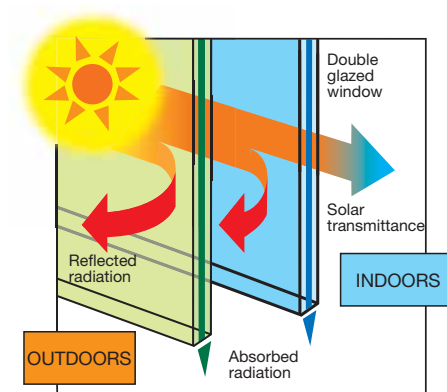

To prevent heat gain, the lower a window's Solar Heat Gain Coefficient (SHGC), the less heat enters a home from solar radiation. The SHGC is a number between 0 and 1 which represents the fraction of solar radiation admitted through a window, including what is absorbed and subsequently released inward.

Sunlight can fade and degrade many organic materials, like carpet, fabrics, paper, artwork, paints and wood. The main offender is ultraviolet radiation, which is the most energy intensive and thus most likely to break chemical bonds. Window and glass selection can influence the type and intensity of transmitted radiation.

With Trend® Thermashield®, in cold climate areas it is now possible to have lower heat loss, less air leakage, and warmer window surfaces that improve comfort and minimise condensation. u-Values that are lower (around 1.5-2.3) provide excellent performance.

Homes that require significant heating with older style (single-glazed) windows are a major source of unwanted heat loss, discomfort, and condensation problems. They feel colder because more heat is radiated from a person's body to the glass, which is at a much lower temperature. Cold glass also creates uncomfortable drafts, as air next to the window is cooled and drops to the floor.

With Trend® Thermashield®, in hot climate areas you can significantly reduce solar heat gain and improve comfort while retaining clear views and daylight.

When strong direct sunlight strikes interior surfaces, it creates overheating and discomfort. Windows with low solar heat gain low-e glass (spectrally selective) can reduce this effect, while still providing light and view. Shading of windows is also very effective. Trend® Thermashield® window cooling options are recommended here. In these areas the lower the SHGC (Around 0.5 or lower) the better protection from solar radiation heating the home.

In most climates, savings can be improved even further by substituting glass with a near-invisible low emissivity (or 'low-e') coating. However, while a low-e coating on simple single glazing reduces that part of the heat transfer, it does nothing to reduce conductive and convective heat flow. A much better solution is to reduce all three forms of heat transfer. To do this, you need an insulating glass unit (IGU or double-glazing).

The most common filling gas between the panes of an IGU is dry air. The narrowest air gap used is 6mm, but

wider gaps (10-20mm) will improve the performance. For even greater performance, the IGU should have a low-e coating on at least one pane and argon gas fill between the panes. Correct installation around windows and doors will also improve comfort by reducing cold air leakage.

High-performance windows systems like Trend® Thermashield® make homes more comfortable, reduce annual energy bills, and lessen peak heating and cooling loads. This means you can use a smaller heating or cooling system. It's also much easier on the environment. Trend® Thermashield® frames with low thermal conductivity and low air infiltration complemented by energy efficient glass balances the entire window system.

Trend® Thermashield® means greater control, bigger savings and, most importantly, one less thing to worry about.

protection from extremes

COLD CLIMATE

In climates where the largest energy load is in heating the home, the following Thermashield® window options are recommended.

We have listed your options broadly from 2 to 7½ stars (the stars to the far left of the table). The more stars, the more protection from the cold.

soundmizer[®]

combat the noise

With the constant need to combat extremes of noise, windows and doors can often be the weakest link in the isolation of noise from outside a home.

Since sound is energy, effective barriers must have mass and density and a low resonant frequency to stop or reflect the energy.

Trend® SoundMizer® products are high performance, acoustic options designed to minimise troublesome noise.

Trend® understands this requirement. Efficient acoustic management starts with the SoundMizer® collection from Trend®.

Solutions up to rW 43 can be achieved with single and secondary glazing elements for any noisy environment.

For details of individual test results, consult the Trend® Sales Executive in your area or call 13 72 74 to be transferred to the nearest sales office.

special products

The only limit is imagination.
Do it your way.

Are you looking for grand expanse
of glass to run the entire length of
a waterfront apartment? A uniquely
glazed archway to give a house
extra character?

Perhaps you want round windows
or there's a particular tint or colour
you have in mind.

At Trend® we'll work with you
to design and build exactly the
window or windows you have in
mind. All you have to do is ask.

Compliance Certificate

*Trend Windows and Doors is a participating member of the **AWA Accreditation Program**, a **7 year Guarantee** against faulty workmanship and materials, (subject to TWD's warranty clause in our terms and conditions of sale) is committed to the **Industry Code of Practice** and has met the requirements of the annual **AWA Compliance Audit** conducted by a **NATA** accredited audit.*

*This certifies that at the time of delivery, the windows and / or doors supplied by Trend Windows and Doors Pty Limited to the address site below were manufactured and glazed in accordance with **Australian Standards AS2047 - 1999 and AS1288 - 2006** to suit the nominated design wind pressures of: pa as per details supplied to Trend Windows and Doors Pty Limited at the time of order.*

Trend Windows and Doors Pty Limited accepts no responsibility for the installation of windows and / or doors.

Please note that windows and / or doors must be installed in the nominated locations for which they are designed, in accordance with the window industry and manufactures guidelines and recognized building practices. The installation of windows and / or doors shall be carried out so that the requirements of AS2047 - 1999 and AS1288 - 2006 are satisfied.

installation instructions

Ensure the correct glass type and window rating has been specified for the particular application.

When fixing frames follow these simple steps:

1. Fit flashing to window surround as required. *Refer Trend® Installation Detail*
2. Frame must be packed plumb, square and not twisted between the opening. Ensure the sill is fully supported, failure to do so may result in sill roll on sliding windows.
3. Secure aluminium windows by nailing through reveal. Timber windows should be secured by back nailing through stud, not face of frame to stud. Alternatively, on cavity brick construction use galvanised building lugs located at 450mm maximum centres.
4. Keep sash closed whilst installing frames.
5. Sill bricks should be at least 15mm clear of window frame to allow for settlement.
6. Do not stand on the windows, or use them as a support for scaffolding, or slide material through the frame.
7. Do not permit weight of eaves or arch bars to bear on aluminium or timber frames.
8. Remove cement mortar dropping from windows immediately, taking care to avoid scratching glass and frames, as permanent damage can result.

No guarantee will be given if aluminium painted surfaces come into contact with acid when cleaning brickwork. Refer Terms and Conditions of Sale for full details.

NOTE: The aluminium sill and outside brick skin must be separated with an isolator to prevent possible reaction between brick and mortar and the aluminium frame which can lead to crevice corrosion.

The sill must be level side to side and front to back and fully supported during and after construction.

window ratings

All Trend® Windows are made to meet Australian Standards regulations AS2047 and AS1288.

These standards relate to the glass type, wind pressure and water penetration ratings of the window. However, as weather conditions vary it is essential that the correct window rating or design wind speed for the specific location be supplied to Trend® Windows & Doors prior to quoting and manufacture. This is further explained in AS2047.

The applicant for building approval or the approving authority shall nominate the window rating appropriate to the location of the building.

The minimum rating for each wind classification and a guide to the design wind pressure are set out in AS2047.

The minimum rating for housing is set out in AS2047.1, and the design window pressure for buildings other than housing shall be established appropriate to the location of the building.

Information on determining the window rating specification is available from AS4055, the Australian Window Association or Trend® Windows & Doors.

Compliance to Standards:

It is important to ensure that a valid compliance certificate is obtained for presentation to certifier/regulator to prove compliance to BCA and AS codes. An example of this is shown opposite.

care & maintenance

On site, windows and doors should be stored in a clean dry area free from cement, lime, paint, acid etc.

During installation they must be protected from building fall-out such as wet plaster, mortar, paint and welding splatter.

Remove wet plaster, cement, mortar and other droppings immediately, using ample clean water and a sponge or rag, to avoid permanent staining or scratching of finished surfaces.

If removal is delayed and scraping becomes necessary the surface finish may suffer. Door tracks and window sills should be protected from planks, scaffolding and barrows, and kept clean of grit and dirt.

Acid used for cleaning brickwork must be prevented from dripping onto aluminium or timber surfaces. Should this fail the acid must be immediately washed off with ample clean water.

If stripable coatings or pressure sensitive tapes are used to protect exposed surfaces, care must be taken not to damage the finish during their removal. Prolonged exposure to sunlight can make them increasingly difficult to remove.

maintenance conditions

1. All powdercoated surfaces should be cleaned using a soft cloth or sponge with a solution of warm water. Where the atmosphere is deemed to be non-hazardous eg. rural, the period between cleaning frequency can be extended up to twelve months. In industrial environments or environments with atmospheric pollution the normal frequency of cleaning should be at not more than three monthly intervals. However where there is high atmospheric pollution, such as a marine/coastal environment, cleaning should be conducted at monthly intervals.
2. Remove cement mortar dropping from windows immediately, taking care to avoid scratching glass and frames,

as permanent damage can result. Trend® Windows & Doors will not be liable for any damage that may occur if the timber or aluminium painted surfaces come into contact with acid when cleaning brickwork.

3. Timber products **MUST BE** sealed (within one (1) month of delivery) with two coats of paint, varnish or sealer to both faces and edges including top and bottom. Exterior quality finishes in light reflective colours (not DARK colours) must be applied to all products exposed to direct sunlight or the elements.

guarantee

- a) The benefits conferred by guarantees herein are in addition to all other rights and remedies in respect of the goods or services of which a consumer has under the Trade Practices Act ("the Act") and similar State and Territory laws.
- (b) Trend® Windows & Doors guarantees the product(s) supplied against defects arising from faulty workmanship or materials for a period of seven years (12 months for moving hardware and parts) from date of delivery and guarantees that services will be rendered with due care and skill. These guarantees shall be effective provided the following general and specific warranty conditions are complied with:-
- (i) The product is installed and maintained in accordance with the manufacturer's and/or the Australian Window Association - industry recommendations where applicable, and has not been subject to misuse, abuse or neglect.
 - (ii) Timber products are to be sealed (within one (1) month of delivery) with two coats of paint. Varnish or sealer to both faces and edges including top and bottom. Exterior quality finishes in light reflective colours (NOT dark colours) must be applied to all products exposed to direct sunlight or the elements.
 - (iii) All solid construction timber doors must be hung with three (3) 100mm hinges.
 - (iv) A warp in a door will not be considered a defect unless it exceeds 5mm.
 - (v) Aluminium product surfaces which have been treated with a powdercoat finish provide a much higher resistance to scratching or scuffing and protects against normal weather conditions; however Trend® Windows & Doors does not warrant against fading or colour change due to normal weather conditions which will cause any coloured surface to fade or darken gradually.
- (c) The Customer's attention is drawn to Section 68A of the Act which has the effect of enabling suppliers in respect of contracts for the supply of goods or services not being goods or services of a kind ordinarily acquired for personal, domestic or household use or consumption to limit their liability in certain circumstances for breach of certain of the conditions and warranties implied by the Act.
- (d) Conditional upon the goods or services provided by Trend® Windows & Doors not being of a kind ordinarily acquired for personal, domestic or household use or consumption and subject to any specific warranty or condition set forth herein and any warranty as to title implied by Section 69 of the Act and provided that in the circumstances it is fair and reasonable the liability of the Company is limited.
- (a) In the case of goods, any one of the following as determined by Trend® Windows & Doors:-
 - (i) the replacement of the goods or the supply of equivalent goods; or
 - (ii) the repair of goods; or
 - (iii) the refund of moneys paid;
 - (b) In the case of services, one of the following as determined by Trend® Windows & Doors:-
 - (i) the supplying of the services again; or
 - (ii) the refund of moneys paid
 If the goods or services supplied are not in accordance with the warranties then the Customer will advise the Company in writing to replace or repair the goods, resupply the services or make the payment as the case may be.
- (e) To the full extent permitted by law, but subject always to the above terms, all conditions and warranties not expressly contained herein are hereby expressly negated and excluded.
- (f) Subject to 8(c) and (d) above, Trend® Windows & Doors liability for any breach of contract or for any negligent act or omission is limited to the cost of replacement of the goods or supply of equivalent goods and shall not extend to consequential loss, loss of profits or any liability for damage to property or death of or injury to persons howsoever caused.
- (g) If the goods or services provided by the Company are acquired for personal, domestic or household use and are not of merchantable quality or fit for the particular purpose advised by the Customer to Trend® Windows & Doors or in accord with a description or sample given by Trend® Windows & Doors to the Customer or free from any legal restriction on ownership then the Customer shall have the right to return the goods and claim a refund; and may be entitled to consequential damages.
