

GREYWATER TREATMENT SYSTEM

OASIS™

Meets the wheelbarrow test! Fits down the side of the house and no excavation!

The latest technology in
Greywater
treatment and
Recycling

- High performance, compact system
- Above ground installation - no excavation required
- Will accept water from laundry, shower, bath, handbasin
- Biological treatment, followed by UV disinfection - no chemical addition
- Treated water suitable for clothes washing, toilet flushing, garden watering, car washing
- Modern appliance design
- Fully automatic, no intervention by user
- Can be remotely monitored
- Ideal for integration with rainwater collection systems
- Continuous process

Take Control!

The OASIS GT600 from Nubian will generate water everyday, independent of rain, and save precious drinking water!

GREYWATER TREATMENT SYSTEM

OASIS™

About the system

Nubian Water Systems introduces the latest technology in greywater recycling with its new age slimline treatment unit. The system can be installed beside your house, requiring no excavation or disruption to your garden.

It is as easy to install as a hotwater system or other household appliance.

The system is housed in three lightweight, slimline units:

Greywater Tank holds household greywater prior to processing

Processor Treatment system

Recycled Water Storage Tank for recycled water applications as listed

3 Stage Process

1. Separation of lint and other coarse materials to prevent blockages and fouling of the system.
2. Water flows through a bed of proprietary media in the Processor. Contaminant removal is achieved through filtration, adsorption and biological treatment.
3. Ultraviolet (UV) disinfection completes the treatment process before water is stored for recycling.

Our authorised representatives and fully trained staff can answer any questions and provide information to help you and your council.

Patent Pending. Proudly Australian owned and made.

Unit Dimensions:
Width 2415 mm
Depth 450 mm
Height 1900 mm

Access & Clearance requirements subject to site inspection.

RECYCLING OPTIONS	OASIS
Toilet flushing	YES
Aboveground irrigation	YES
Cold water supply to washing machine	YES
Non-potable hose cocks*	YES
Pavement and car washing*	YES
Fire fighting*	YES

*Subject to local Council approval, indoor re-use not accepted currently in Queensland

Installation

- Plumbing from your toilets and kitchen must be separated from your greywater plumbing.
- The tanks can be installed internally or externally.
- Installation can be completed in less than a day.
- All work is to be carried out by a licensed plumber.

Local Council approval is required prior to installing any on-site wastewater treatment. The OASIS GT600 is fully accredited in NSW, Qld, ACT and Vic. Call us to check accreditation in other states.
