SPECTRUM

# SPECTRUM EXCELLENCE

The new generation in Clean-Off Zones

## PROBABLY THE BEST

**Spectrum "Excellence"** is distinctive from the standard range of present products in this field. An ingenious combination of small and larger polyamide filaments results in an optimal density. As a consequence dirt and moisture are more effectively stopped and contained, which results in a reduction of cleaning costs.

Also the spread of "fine dust" in the air will be reduced dramatically. This will result in an improvement of the indoor air quality and consequently in a reduction of the ill effects on health (the first step in fighting the Sick Building Syndrome).

**Spectrum "Excellence"** is a stylish design, which not only hides the walk-in dirt and moisture, but will result in a practically seamless floor. The range consists of 10 attractive colours including a purple and a turquoise. **Spectrum "Excellence"** is complimentary to other floor coverings, is easy to clean and can be used in heavy traffic areas.

**Spectrum "Excellence"** is produced using solar energy and 33% of the yarns are recycled.

**Spectrum "Excellence"** exceeds NCC fire requirements for all classes of buildings, is rated to European standards (EN1307) as "Commercial Heavy" & also tested with excellent results to European standards for slip resistance, colour fastness, dimensional stability & acoustical insulation.

**Spectrum "Excellence"** the new generation Clean-Off-Zone has a 7-year wear warranty, subject to correct installation and maintenance.

## Available Sizes

**Spectrum "Excellence"** is available in rolls. Length is approx. 25m and width 200cm. (excluding a 2cm vinyl edge). These measurements are approximate.

9mm  
ISO 6256 < 2kv

### Application

Over 75% of dirt in a building is walked-in from outside.

**Spectrum "Excellence"** provides a strong barrier to dirt, resulting in cleaner buildings and significant cleaning and maintenance cost savings over the lifetime of your floors.

**Spectrum "Excellence"** is suitable for commercial applications such as schools, offices and healthcare buildings.
