# Hospital Taps To Reduce The Spread Of Infection

DESIGNING healthcare facilities are always challenging for Architects, Engineers and Project Managers, and as Australia's most experienced manufacturer and supplier of taps and drainage products for the health and aged care industry, we understand this challenge.

Galvin Engineering's range of Healthcare Tapware minimises the spread of infection in hospitals by providing appropriate methods of activating water flow for hand washing. The NEW CliniLever® range

incorporates the latest technology and designs to minimise the risk of the spread of infection.

Other benefits from using the Galvin Engineering Healthcare Tapware ranges are:

- Conserves water – All tapware is WELS rated and reduces energy costs.
- Improves hygiene – "No touch" and elbow/wrist action activation reduces the spread of germs and increases ambient cleanliness.

- Disabled compliant – The simplicity of our product's activation makes everyone's experience more comfortable, regardless of age or physical ability.
