Storsafe Storage Systems

The Storsafe over bonnet storage system is an all aluminium product designed to increase storage in unit car parks and garages, without restricting the room you need to park your car.

There is often limited storage space in many apartment buildings, especially for storing bulky items. In addition, some buildings do not have lock-up garage facilities but have designated car parking spaces only. Storsafe has been designed to utilise the area above the car parking space, it has sufficient room to park the bonnet of a car underneath, without impinging upon the car park itself. Storsafe neatly reduces the clutter often seen in apartment garage floors, as it can house a variety of valuables and bulky items. The sturdy framework guarantees the compartment will not collapse once filled.

Each compartment comes with a three-point locking mechanism, so belongings are secure from damage and safe from theft. As the compartment is raised off the ground, possessions are protected from fire, water, dust and vermin. Storsafe is one of the safest, strongest, most versatile storage solutions available.

An enclosed cupboard option is available where a car does not need to park underneath. This option provides an additional 2.7 cubic m storage space.

Quality & Innovation

Mailsafe Mailboxes

Mailsafe Mailboxes have been manufacturing quality mailboxes for over 25 years. Mailsafe specialises in modular mailbox units (banks) for unit and townhouse developments, retirement villages, shopping centres and commercial premises. An extensive range of quality designed mailboxes allows customers flexibility in choice. Mailsafe is one of the few Quality Assured manufacturers of mailboxes in Australia. Our mailboxes are precision manufactured from fully extruded aluminium and our streamlined procedures ensure every mailbox we build is of the highest quality. Manufacturing processes for the custom-built range of mailboxes permits the dimensions of the mailbox to be altered (width, height and depth) to suit your specific project requirements. Mailsafe Mailboxes have water resistant qualities and are made from powdercoated, lightweight, durable aluminium to withstand harsh Australian weather conditions.

Mailsafe Mailboxes is a Quality
Assured Commercial Division of
Help Enterprises.

Since 1968 Help Enterprises, a community based non-profit organisation, has been providing assistance, support and employment opportunities for people with disabilities Our purpose is to provide people with disabilities vocational and prevocational training, personal development, access to employment, job support and a career, The many divisions in Help Enterprises, including Mailsafe Mailboxes, support the belief that people with a disability can gain independence and skills that will enable them to add value in industry and to their community.

Mailsafe Product Range

allow customers to have their mailbox on Recommended mailboxes. demand, the MSF range has revolutionised These mailboxes can be manufactured as a the mailbox industry. The MSF2 and MSF3 standard sized mailbox, or as a custom built mailboxes are capable of receiving large mailbox to suit your design or dimensional quantities of mail, including A4 envelopes requirements. The flat-floored APR2 and and magazines without folding. The flat floor APR3 mailboxes are large enough to receive of the mailbox means that the mail cannot an A4 envelope or magazine without folding catch on internal protrusions as it is being or accidental protrusion. The APR3 is delivered, thereby eliminating the risk of especially suited to situations where width mail protruding from the aperture slot after restrictions apply, as the box is narrower delivery. Mail is also easier to retrieve from a cross the front and deeper. All the features the flat floor. The straight aperture cowl of the MSF range are incorporated in the APR (weatherhood) provides a modern, stylish mailboxes. However, the APR mailboxes are look and does not restrict the receipt of slightly larger than the MSF mailboxes as large quantities of mail in the way of some they feature a sturdy individual framework mailboxes with curved weatherhoods.

The MSF3 is especially suited to situations providing even greater mail security. where width restrictions apply, as the box is narrower across the front and deeper. Setting the MSF range apart from the competition is the added feature of a single The Series 7 and 7L are mailboxes designed panel roof, as there are no joins in the centre rain. In addition, all external rivets and screws are counter-sunk for a safer, neater look. The MSF range meets the design requirements of Australia Post.

to fit 200mm block work installations. They it provides additional protection from the will not hold A4 envelopes without folding but will receive most residential mail.

Storsafe Product Range

The STF1 storage compartment consists of one or two large compartments, depending on availability of space. It is manufactured with four stands, with adjustable feet, thereby allowing for the height of the compartment/s to be varied to accommodate differing vehicle heights. An enclosed cupboard option is available to the bottom of the main compartment if required.

The STF2 is manufactured using the same technique as the STF1 however, increasing the height of the space below by reducing the height of the compartment, allows for higher vehicles to fit underneath. This option is most suitable for 4WD

Storsafe Standard Features Storsafe Optional Features
