Pre-finished Lining Boards

Made in Australia using eco-friendly timber and advanced production techniques, Glosswood pre-finished lining boards are the smart way to give any home the classic look of natural timber.

Manufactured from Paulownia – a fast-growing termite resistant plantation hardwood that's light, strong, and dimensionally stable with a beautiful straight grain – Glosswood uses a unique ultra violet finishing process that stains and coats the boards on all four sides giving consistent colouring and making them highly durable, moisture and fade resistant.

Easily installed using concealed panel pins and liquid adhesive, Glosswood boards are supplied end-matched for perfect joints – and because they're already finished there's no need to sand or paint ... and big savings on time and labour.

Light in weight – ideal for ceilings – Glosswood boards are available in the traditional 100mm width or the new, wider 150mm board for even faster installation complete with a range of matching trims for a truly professional finish.

So why wait ... get the Glosswood look today!
