## PAINT REMOVAL SYSTEM

### IT'S PROVEN

PEEL AWAY is a revolutionary patented concept in paint removal. The PEEL AWAY system has been specially formulated to remove multiple layers of paint in one clean fast application. PEEL AWAY offers a comprehensive range of products to satisfy most stripping requirements. Numerous projects have successfully used the PEEL AWAY system in the past 15 years.

### IT'S UNIQUE

PEEL AWAY provides innovative solutions for paint removal. This Poultice method of chemical stripping is a recommended safe process by the EPA. It prevents atmospheric pollution when using the laminated cover. It is safe for removal of Lead Paint and can fully contain the waste. The usage of harmful solvents are reduced, as are any risks to health.

### IT WORKS

The product is a thick paste that is applied to the surface and covered with a special laminated paper. The product is sealed in and will emulsify the many layers of paint safely. The laminated sheet is then peeled away with the paint carefully, ready for disposal. The surface is then washed with water.

#### YOUR SAFE CHOICE FOR ANY RENOVATION PROJECT

##### SUITABLE FOR

- Domestic
- Commercial
- Industrial
- Automotive
- Marine

##### REMOVES FROM

- Softwood and Hardwood timbers
- Bricks, Concrete, Stone and Marble
- Metal, Iron and Steel, Aluminium

- Chemical Resistant coatings

300g- 1kg- 5kg- 15kg- 225kg

### APPLICATION:

- PEEL AWAY PASTE can be applied by brush or trowel. The special laminated cover allows product to work in a sealed environment. Use Peel Away paper only.
- Average test patch for PEEL AWAY 1, PEEL AWAY 8 should be 24 – 72 hours. PEEL AWAY 9 on fibreglass boats anti-fouling 6-24 hours.
- Trial packs size 300g is available for test patches. Do not leave test patch on too long, since surface will return to original condition and procedure will have to be repeated.
- \*PEEL AWAY 1 MUST BE PROPERLY NEUTRALISED PRIOR TO RECOATING THE SURFACE. WE RECOMMEND PEEL AWAY NEUTRALISER.
