COMMERCIAL **FLOORING**

...AND THEN CUSTOM DESIGN
A HOMOGENEOUS SHEET VINYL
FLOOR TO PRECISELY COMPLEMENT
THE STYLE AND COLOUR PALETTE
OF YOUR INTERIOR.

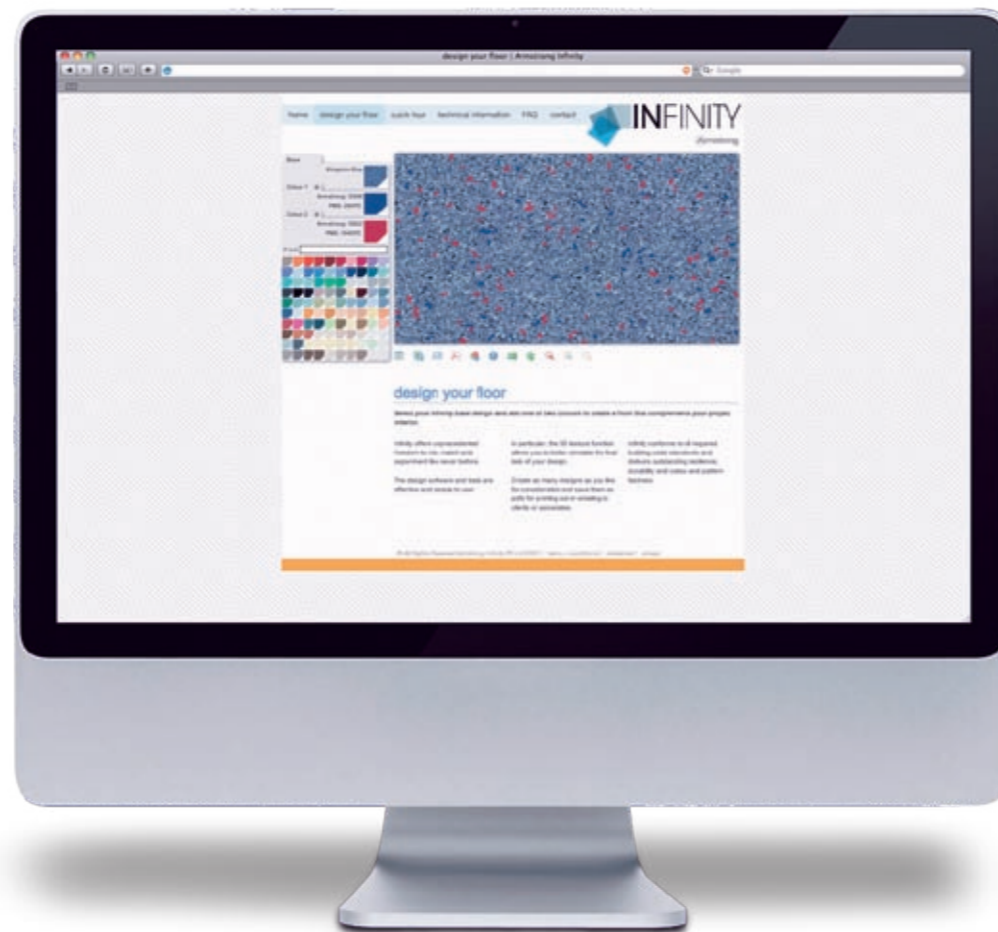

www.armstronginfinity.com

...CREATE.

Introducing Armstrong Infinity, an innovative concept in Commercial Resilient Vinyl Flooring that allows architects, interior designers and specifiers to custom design a floor for short run manufacture.

- Infinity is based on Armstrong Accolade Plus and Accolade Safe Plus.
- Starting with any of the standard 24 base colour combinations of Accolade Plus and/or Accolade Safe Plus, you can add one or two more colours of your choice.
- The colours that can be added are chosen from the Armstrong standard colour chips range, which have been matched to the international Pantone Matching System (PMS), so that you can rely on the accuracy and appearance of your designs.
- A sample of the design is produced for you to approve.
- Production takes just 8 weeks from the date you approve your design sample.
- The minimum production run is 900 square metres, but by negotiation, we can manufacture down to 300 square metres.

HOW IT WORKS.

Infinity is a web-based solution that allows you to create a custom-designed floor online and then save and email pdfs to clients or colleagues.

- Infinity offers unprecedented freedom to create a custom-designed floor by mixing, matching and experimenting like never before.
- The design software and tools are effective and simple to use; in particular, the 3D texture function, which allows you to better simulate the final look of your design.
- There is no limit to the designs that can be created for consideration and saved as pdfs for printing out or emailing to clients or colleagues.

STEP-BY-STEP GUIDE.

Using the Infinity system couldn't be easier or more convenient:

STEP ONE.

Go to the 'Design Your Floor' page at www.armstronginfinity.com and familiarise yourself with the design tools.

STEP TWO.

If you intend to save and submit designs to Armstrong, you will need to register your details. The website will prompt you to register when required.

STEP THREE.

You can create and save as many designs as you wish using the online application.

STEP FOUR.

Once you have decided on your preferred design for production, save it and request to see an Armstrong Sales Representative. If you have not already opened a user account, you should create one by following the online prompts.

STEP FIVE.

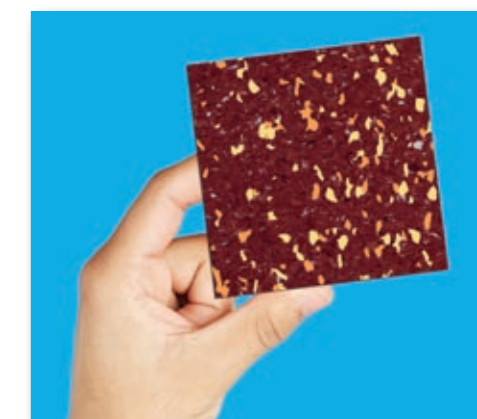

You will be contacted by an Armstrong representative within 7 days (or earlier if required) to discuss timing, production of your customised Infinity Lab sample and any particular project requirements you may have.

STEP SIX.

Lab samples are produced and delivered to you for final approval within 14 days of sample being requested.

STEP SEVEN.

Production and delivery of an Infinity floor takes 8 weeks from date of approval of Lab sample.

FAQ.

FAQ.

If my choice of additional colours is taken from the standard Armstrong colour chips range, how can I tell what the final result will be without an accurate colour guide?

When you go online to start designing your floor, you'll see that the Armstrong standard colour chips range has been matched to the international PMS colour system to help you in your colour selection.

Because colours don't necessarily reproduce accurately online, do I get a pre-production sample prior to confirming the production run?

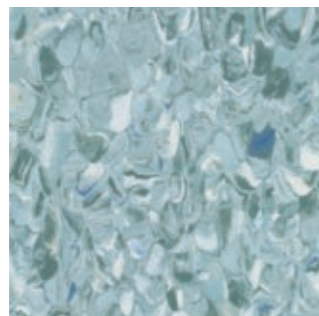

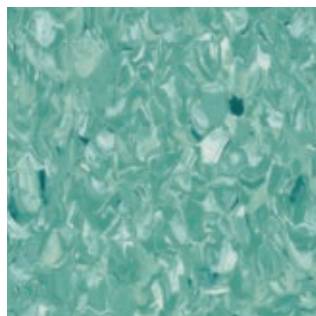

Yes, pre-production samples are supplied as part of the service.

How closely will the pre-production sample match the final product?

Any variation between the sample and the finished product will be minimal. The manufacturing process varies slightly, but the materials used for producing samples are identical to those used in the production run.

Can I add more than 5% of 2 chip colours to the Accolade base?

The Infinity production system is limited to 2 chips at 5% (eg 2.5% per chip). However, we have the flexibility to produce a more customised product if you wish, with price on application.

Can I create my own base colour?

See previous answer.

How long will production of my design take?

Armstrong has two production facilities in Melbourne, which allows short lead times and production flexibility. Your customised Infinity floor will take 8 weeks from approval of sample.

What is the minimum run for a customised Infinity floor?

900 square metres, but we can produce down to 300 square metres by negotiation.

Can you produce additional quantities of my customised design if required?

Due to the production process and the online application, any design you have specified and saved can be recreated at any time.

Note that possible variations in pigments and raw materials may result in shade and pattern variations between different batches.

Can I get Infinity in a Safe Plus finish?

Yes, but the minimum quantity is 900 square metres.

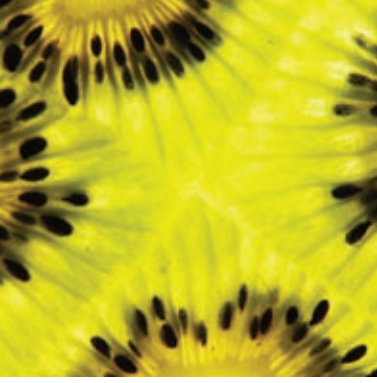

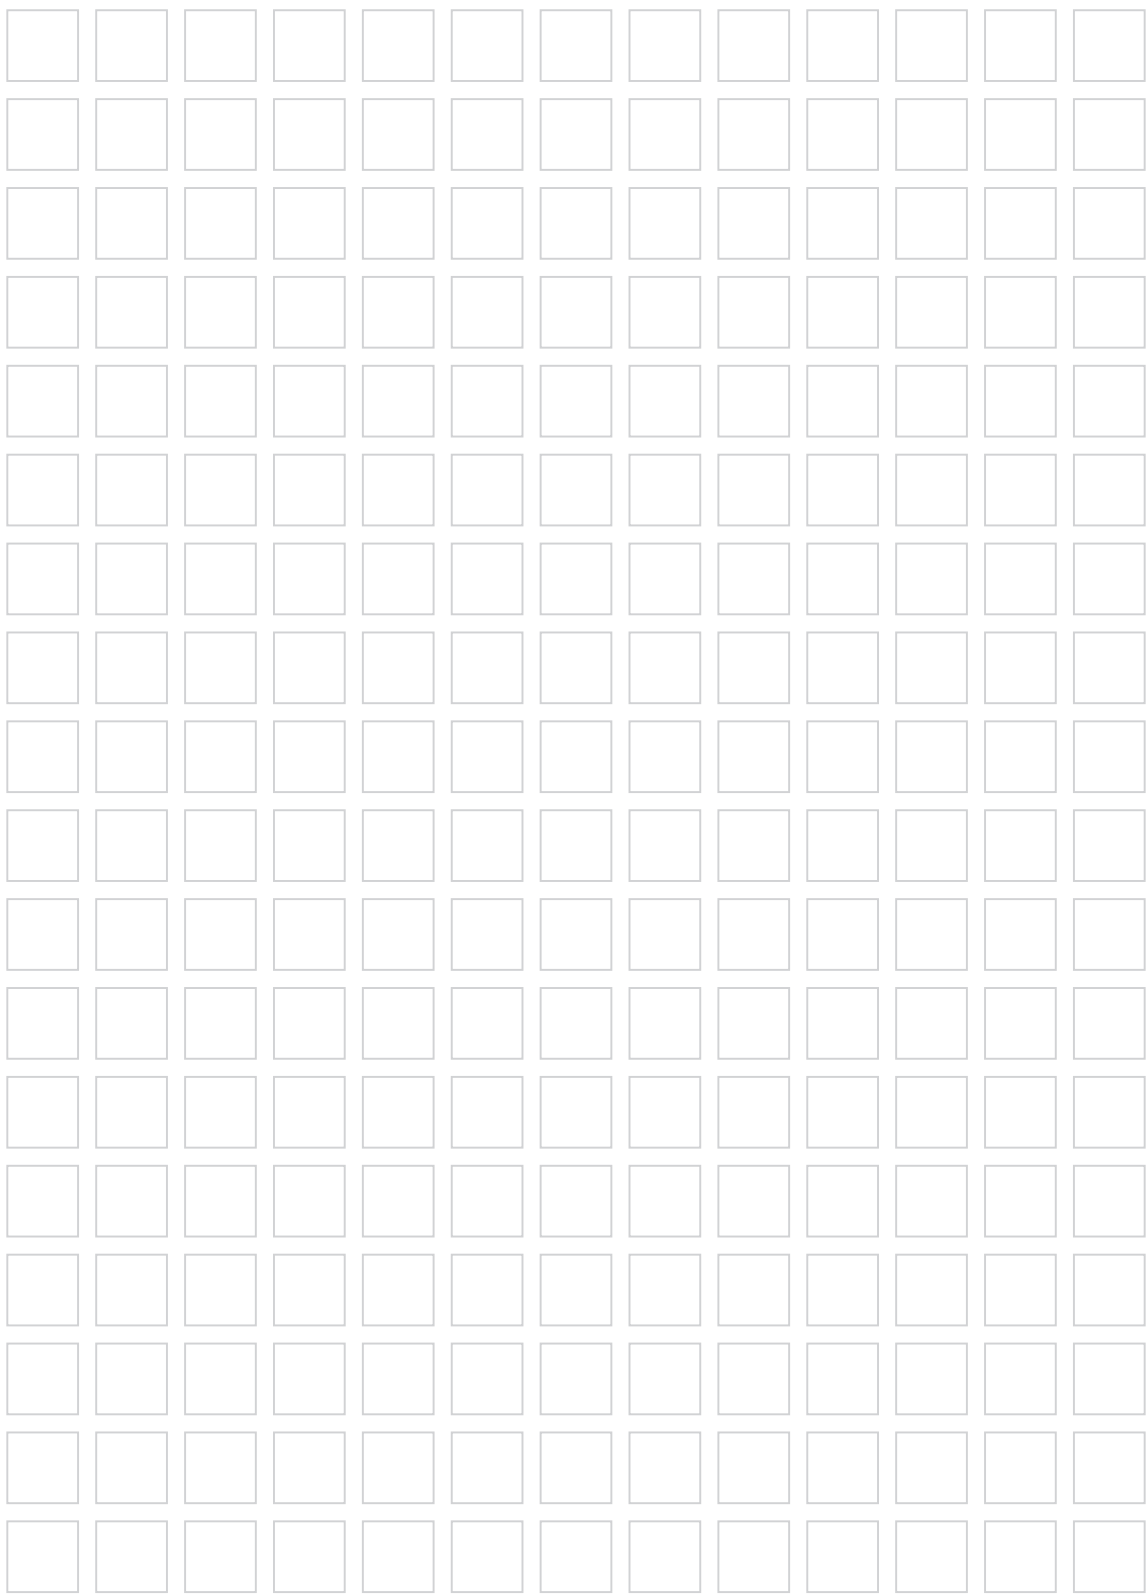

Is it possible to customise other Armstrong flooring products?

We have the flexibility to produce customised versions of all our Australian made sheet and tile products.

What are the technical specifications of Infinity?

Technical information is available on the web at www.armstronginfinity.com or contact your Armstrong Sales Representative for assistance.
