

# FLEXIBLE FIRE RESISTANT DOWNLIGHT ENCLOSURES

*fit from below!*

**Proven  
Flexible  
Easy**

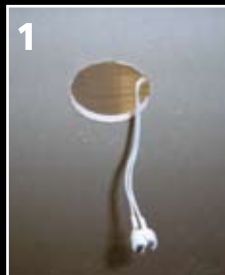

*Prevent consequences no-one can afford*

## Why Flexi™ Fire Resistant Enclosures?

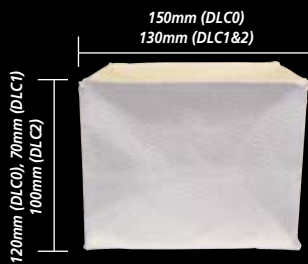

- Easy compliance to AS/NZS 3000:2007 downlight installation requirements, with full instructions.
- Prevent common downlight ceiling fire devastation. Smoke alarms and insurance cover don't do this! Safe-touch enclosure around ignition temp. globe.
- Prevent loss of vital insulation benefits
- Prevent severe downlight positioning limitations. Instructions to install Flexi™ F.R.E's touching timber beams and insulation.
- When above ceiling access is not practical.
- Prevent 24/7 indoor pollution through downlights.

## Flexi™ DLC models suit

- Limited access areas e.g. between floors, skillion roofs, cathedral ceilings etc.
- 12V downlights (240V - DLC0 model or larger)
- Most downlight sizes (*larger sizes on application*)
- Acoustic versions available

*fit from below!*
