

The latest in European design

Pittella has launched some new editions to our range of door hardware which are sure to impress. The latest in design from some of the world's leading Italian architects, come together to form this new series. These items include a softer feeling square lever (Art. 1735), with the option of a round or square rose; a fluid door pull (Art. 732) with a natural curve to its rectangular form and a new centre door knob (Art. 186) that provides an innovative option for front doors. These and many more new items are available to view online or in our new catalogue folder, please contact us to receive a copy.
