- Principal purchasers, business operators, decision makers and commercial/industrial product end users

### ARBS 2010 SEMINAR PROGRAM

A changing climate, new government regulations, new industry directives, new energy efficient technologies and applications, higher consumer demands, increased competition and greater professional accountability are driving unprecedented change in HVAC & R and related industries.

#### *Sustainability is now mainstream*

Few who supply, design, install, maintain and/or manage HVAC & R systems will not be affected by change.

Stay ahead of the competition, better your professional service and reputation, improve proficiency and save time and money. Be at the forefront of change and better position yourself and your company for the future.

National and international experts will present more than 30 thought-provoking and practical seminars to help you meet challenges head-on.

Visit [www.arbs.com.au](http://www.arbs.com.au) for full details of this exciting, informative program

### TRADE ONLY

ARBS is a trade only exhibition. Admission is restricted to HVAC & R and building services professionals and trade associates. Children will not be admitted.

Check out our exhibitor product and services directory and full seminar program online.
