

Sub-Surface Drainage

Flo-Log® provides reliable & effective site sub-surface drainage.

The Atlantis range Flo-Log® products provide quick and effective drainage for the removal of water away from structures, sports fields and sites.

The quick absorption and strong structural performance of the Flo-Log® products provide years of trouble free service providing peace of mind for contractors and property owners.

The Atlantis Flo-Log® products provide reliable and predictable drainage performance and are far superior to traditional aggregate drainage systems.

Designed for Water Removal & Re-Direction

Atlantis Flo-Log® are designed to easily and effectively collect and re-direct water away from structures and properties.

Benefits:

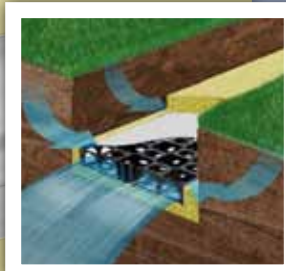

- High Collection & Absorption Capacity
- Low Installation Cost
- Easy to handle
- High Flow Capacity
- Predictable Performance
- Reduced Excavation
- Enhances Waterproofing
- Chemical Resistance
- High Strength
- Durable
- Light Weight

Beautiful Vertical Gardens

Enjoy beautiful and easy to maintain vertical gardens indoor or out with Atlantis Gro-Wall®.

The Gro-Wall® provides complete access to plants and irrigation components for easy and minimal maintenance. The new enhancements provide targeted watering control of individual plants, maximum water efficiency and easy design changes.

Gro-Wall® is the perfect tool for designers creating vertical landscapes and the perfect companion for its' caretakers.

NEW Gro-Pot™

- BUILT IN RESERVOIR
- EXCELLENT DRAINAGE
- U.V RESISTANT
- DURABLE

Vertical Drainage

Atlantis Flo-Wall® wall panels are ideal for any vertical drainage requirements including basement walls, underground car parks and bridge abutments.

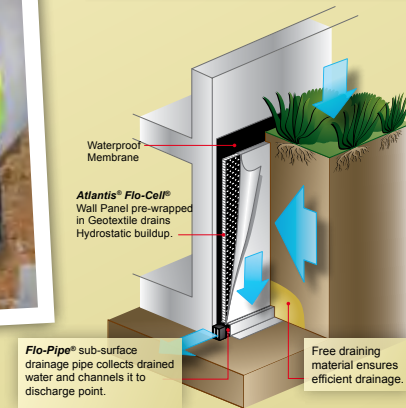

Flo-Wall® panels provide a permanent structural cavity relieving hydrostatic pressure and effectively controlling water seepage.

Flo-Wall® panels are strong, lightweight and rigid making installation of vertical drainage a quick and simple process.

Flo-Wall® panels are available in a variety of sizes and thicknesses to suit your project requirements.

The **SHOTCRETE** process can also easily be applied directly to the Flo-Wall® panels.

Turf Reinforcement

Create a sustainable permeable surface that preserves the soil porosity and prevents compaction.

Benefits

- Protects Root Zone
- Ideal for Gravel Containment
- Disperse Heavy Loads
- Prevents Soil Compaction
- Maintains Soil Porosity
- Sustainable Turf Life
- Durable

Applications

- Access Roads
- Driveways
- Parking Lots

AFTER

BEFORE

Underground Water Storage

Create an underground water tank to suit your watering requirements.

Atlantis modular underground tanks can be installed out of site underneath your landscaping. Tanks can be constructed to hold any volume required. Even swimming pools can be easily converted into tanks, with the peace of mind that the pool can be converted back and recommissioned.

Talk to Atlantis to find out how your home can benefit from an underground water tank.

- Clean Water Storage
- Unlimited Capacity
- Space Saving
- Approved for Potable Water (AS/NZ 4020)

Tank & Channel Applications

- Infiltration Tanks (Absorption)
- Underground Channels (Swale Applications)
- Soak Wells
- Stormwater Harvesting
- Rainwater Harvesting
- Detention Tanks

CONVERT POOLS INTO WATER STORAGE
