DURATRED 516

With ModFit for the perfect entrance

- Designed for convenient usage
 - To be placed in mat wells
 - In conjunction with aluminum framing

Duratred uses only quality products ensuring long term premium appearance and longevity

Heavy duty polypropylene long wearing mat surfaces

Rubber inserts are available for anti-slip surface applications

- ModFit aluminium framing system
 - Aluminum ramping available for loose lay applications
 - ModFit mat well framing available
 - Designed to eliminate foot traffic noise via cushioning and isolating metal on metal contact
 - Simple, easy and efficient

Roll out with Mat Link, Simple and Easy

- Duratred 516 is a heavy weight polypropylene product suitable for constant traffic entrance matting. It features an anodized aluminum finish that does not stain with water or cleaning fluid. It is perfect for formal entrance ways in busy, high traffic areas.

With the revolutionary ModFit aluminum framing system Duratred 516 can simply be rolled out without the need for a concrete recess – just fix the framing in place and drop in the matting. However Duratred has also been designed to be placed into recessed mat wells.

■ Whatever the specifications, shapes or widths, Duratred 516 can be cut to suit your need. Sterling Supplies can provide onsite measuring and then custom manufacture the matting as required.

The ModFit aluminum framing system combined with custom made Duratred 516 matting provides a neat clean visually pleasing finish. No compromises are required, no in-filling with vinyl or aluminum strips. Custom measurement and manufacturing makes for the perfect fit.

DURATRED 516

The easy entrance
with ModFit

Just lay it down

- Duratred is easier and faster to install than other matting products. With over 18 years supplying and manufacturing commercial matting for builders and subcontractors, Sterling Supplies understand the need to provide quick, easy and effective installation procedure.

No recess required

- With Duratred products and ModFit aluminum framing there is no need to create a concrete recess for the matting being used. With a 10mm height, the framing system meets and abuts with most carpets and floor coverings. It's easy!

Custom Sizing

- Sterling Supplies will custom make mats to any size and shape. Contractors, builders and resellers can supply dimensions or template drawings. Sterling Supplies will measure down angles, provide curving and a variety of other options unavailable elsewhere. On substantial projects, Sterling Supplies will arrange a site visit and achieve the most accurate measurements available.
