THE BENCHMARK IN STONE

“We are proud to offer what is simply the ultimate surface available today. Smartstone’s innovative range of engineered quartz surfaces presents the only affordable way to enjoy the prestige of stone and marble looks – with the practical benefits of quartz’s superior durability. So, whether you are looking for a new kitchen bench, splashback, bathroom walls or vanity top, for a residential or commercial application, I can promise you that no other surface material can match Smartstone. There really is no smarter choice.”

Kon Kalpou, Executive Chairman, Smartstone

The four stunning Smartstone Collections – Santorini, Toledo, Paris and Milan – comprise an exclusive palette of 24 of the purest and most beautiful colours and patterns available. This directional range has been meticulously sourced from leading manufacturers internationally, so the perfection of colour and absolute consistency of Smartstone surfaces can't be found elsewhere. There is a Smartstone colour to suit every style of architecture and personal taste, as well as a choice to suit every budget. So, thanks to Smartstone, enjoying luxurious stone and marble-look surfaces no longer comes with a prestige price tag.

style with substance

Smartstone not only replicates the beauty of natural stone but offers functionality and durability that can't be matched by any other surface. How? Because Smartstone uses cutting edge technology to create a surface that is composed of up to 95% quartz, the fourth hardest natural mineral after diamond, sapphire and topaz. The result is a surface that is highly resistant to impact, heat, scratching, chipping or cracking, and also resistant to acids, oils and liquids – even red wine and coffee. How smart is that?

santorini *collection*:

A dazzlingly beautiful and versatile range of pure, perfect whites.

In no other destination in the world will you see white as bright as on the Greek island of Santorini with its idyllic whitewashed houses. And in no other surface range will you find equally sublime whites than in Smartstone's Santorini Collection.

versatile white

The beauty of white surfaces is that they are perfect for so many interior styles: ultra-modern spaces, minimal Scandinavian decor, lavish Mediterranean-style homes, and relaxed beach houses. White will also refresh older style homes, from Victorian terraces to 1950s apartments, and using white in interiors also makes small spaces appear larger. As well as residential use, the clean perfection of white surfaces also makes them ideal for numerous commercial applications, such as in restaurant kitchens.

THE BENCHMARK IN STONE

toledo *collection:*

Classic creams to warm beige evoke timeless elegance and charm.

With its ancient castle, stone walls and cobbled streets, the Spanish citadel of Toledo is an enchanting place. Its earthy-creamy palette was the inspiration behind the Smartstone Toledo Collection, the most beautiful range of neutral surfaces available.

crème de la crème

Neutrals such as cream and beige are classic shades that always look stylish and refined, and give a space a calming and inviting feel. A neutral surface is ideal for all kinds of homes and interior design styles and can be teamed with many other materials, from wood to stainless steel. Creamy colours and warm beiges can be taken in so many directions in style and colour play, and they also have the added benefit of flattering skin tones and surrounding furnishings.

THE BENCHMARK IN STONE

paris collection:

Rich green and brown define a resilient yet romantic character.

This Smartstone Collection aptly takes its inspiration from a city renowned for its sophistication and style. Its colours evoke facets of Parisian life, from stylish street scenes to elegant parks, and from café colours to the decor in grand French family homes.

living colour

Gorgeous green and brown surfaces bring a wonderful depth and richness to both residential and commercial spaces. They adapt beautifully to vastly different styles of interiors: use colours from this superb palette when you wish to create a sleek, luxurious look; browns and khaki greens can also assume an earthy, rustic character and look perfectly at home in places among nature, from a kitchen in a country home to a bathroom in a leafy bush hideaway.

milan collection:

A dark, sophisticated palette of sleek black and chic grey.

Famously on the cutting edge of design and fashion, the Italian city of Milan lends its name to this stunning, directional Smartstone Collection. Like Milan itself, the collection is bold and modern, offering surfaces in shades that exude Euro-chic designer style.

darkly desirable

Surfaces in dark tones add a sleek, chic and sophisticated look to a space. Black and dark greys pair with every colour beautifully, and shine on their own perfectly. When decorating a space with dark walls or counter tops, add a punch of colour in an unexpected place to bring in whimsy and visual interest. If you love dark colours but ultra-modern is not your style, team dark surfaces with pastel colours, which will create a contemporary style with a softer edge.

the fine details

Smartstone's Polished Finish is a classic, smooth high polish that will beautifully enhance your choice of colour and pattern.

Further tailor Smartstone to perfectly suit the style of your interior space with your choice of edge profile. Smartstone can be fabricated with any edge profile including these popular styles:

pencil round 40mm

mitred apron 20mm

bullnose 40mm

pencil round 20mm

half bullnose 40mm

lamb's tongue 20mm

bevel edge 20mm

Smartstone is designed to be as low maintenance as it is highly practical. It is easily cleaned with warm, soapy water and a soft cloth – that, and a little common sense, is all it requires! Your Smartstone surface will never require waxing or sealing as the quartz composites create low moisture absorption providing maximum resistance to staining. Tested by the CSIRO, SmartStone is resistant to staining from red wine, coffee, tea, fruit juices and liquid food colouring.

five smart care tips

1. Avoid external applications where Smartstone is directly exposed to the elements.
2. Although Smartstone is heat resistant, placing hot items directly onto your Smartstone surface is not recommended; excessive localized heat may damage Smartstone due to thermal shock. Always place hot items on a heat pad or cutting board.
3. Avoid exposure to high impact, particularly on the edges.
4. Avoid exposure to products with high pH levels such as oven cleaner, as well as bleach, paint strippers or nail polish remover. Rinse immediately with clean water to neutralise the effect, and then follow the usual cleaning procedure. Do not scrub forcefully which may result in loss of shine. Regular cleaning with Smartstone Crème Cleanser is recommended.
5. Take care not to place excessive weight on your bench top, such as tradespeople standing on it when painting or carrying out electrical work.

in good company

Smartstone was established in 2003 and relaunched in 2011. Smartstone is a subsidiary of HVG (Halifax Vogel Group), a privately owned Australian company that distributes a range of internal and external decorative finishing products and media materials, including Creastyle Laminates and market-leading Alucobond aluminium composite material. Smartstone has an extensive national distribution network and is available from kitchen retailers, cabinet makers, designers, architects, builders and stone masons.
