

PAPEROCK

STRONG SUSTAINABLE SMART

INTRODUCING PAPEROCK

A NEW INCREDIBLY STRONG COMPOSITE BUILDING MATERIAL

Made from layer upon layer of paper (recycled or from 60% sustainable sources) and bonded with phenolic resin and heat/pressure cured, Paperock is a remarkably strong composite building material.

Sourced and manufactured here in Australia by an Australian owned company, Paperock is incredibly strong for its weight and volume. By cross laminating many layers of paper the tension/compression values for Paperock are outstanding. In addition, the impregnated phenolic resin makes the product nearly impervious to water.

Paperock is made from recycled paper and/or paper from renewable sources making it eco-friendly and 60% sustainable with no VOC emissions.

Paperock can be easily installed by any trained carpenter with normal wood working tools.

PAPEROCK is ideal for:

KITCHEN BENCHES
FOOD PREPARATION SURFACES
ARCHITECTURAL MATERIALS
INDUSTRIAL WORK SURFACES
FURNITURE
and much more!

PAPEROCK

STRONG SUSTAINABLE SMART

PAPEROCK Q&A

Does Paperock stain easily?

Paperock is nearly impervious to water absorption, stains a rare event. Red wine can sit overnight on it and need only a wipe down in the morning!

How strong is Paperock?

Paperock is very strong based on strength to weight ratio. A 20mm thick bench top can be cantilevered to 460mm, much further than any natural stone or stone composite such as Caesar stone.

Does Paperock scratch?

Paperock may scratch or show knife marks if cut on directly. These are easily buffed out with a 3M pad.

Is Paperock toxic?

Paperock is made from paper and a natural resin called Phenolic resin. It has no VOC's or radon emissions. If properly cured phenolic resin composites are non-toxic.

What is Paperock made from?

Paperock is made from paper (either recycled or paper from renewable sources) and a naturally occurring resin called Phenolic resin.

Is Paperock heat resistant?

Paperock can withstand heat up to 180 degrees Celsius or 350 Fahrenheit!

Does Paperock conduct electricity?

No.

Is Paperock impact resistant?

Paperock's unique composite and resin manufacturing process ensures that it can take significant impact with minimal damage.

What colour does Paperock come in?

Paperock comes in 4 standard colours; black, brown, green, white. Special orders can be manufactured with any colour in the rainbow and even alternate/multiple colours can be made within the same sheets.

What can Paperock be made into?

Paperock can be worked with normal woodworking tools by carpenters. Overseas similar products are made into: Benchtops/countertops, cutting boards and professional food prep surfaces, skate ramps, boat building, industrial work surfaces, furniture, handles and electrical backing board.

PRICING of 2440 x 1220mm sheets ex gst & delivery

- **6mm** \$300
- **10mm** \$450
- **25mm** \$900
- **32mm** \$1120

Multi layered sheets will incur a surcharge: 2% per layer for all dark colours, 4% per layer for white. Orders greater than 10 sheets will incur a discount. Please ask about our first time introductory price. Max sheets size is 2850 x 1350mm x 50mm.
