NEW KEYLESS DIGITAL DOOR LOCK

The **CODE LOCK**™ CL-YL-99 series of code access door entry units distributed by Fairmont Marketing Australia are a state-of art, easy to operate code based lockset. They have been designed to be simply retrofitted into existing cut-outs used in the most common entry applications used throughout Australia and New Zealand and can store up to 10 different user codes variable from 1 to 15 digits in length.

Features include:
- Weatherproof external handle to resist even the harshest conditions
- Code encryption to prevent spying
- Blue backlit keypad for use in low light conditions
- Durable handle springs and latching components
- Clutching outside handle to prevent forced opening
- Over 100 Billion possible code options
- User friendly setting and changing procedures
- Deadlatching to prevent manipulation
- Low battery indicators with emergency battery pack override
- Available in the finish of Stainless Steel, Polished Brass, and Black Nickel
