Customised aluminium continuous and fixed Louvre Systems

With the increasing recognition of the need to provide innovative ideas and solutions to today's built environment, Aluminium Industries Architectural Systems introduces its extensive range of customised aluminium continuous and fixed Louvre Systems.

Aluminium Industries is a growing company built on the commitment and dedication of our staff developed over a combined 150 years of experience in aluminium component manufacturing and design.

Sustainable Technology

Internal heat and light control in today's architecture has become a focal point in determining the energy and cost efficiency of a project. The use of either continuous or fixed louvre systems has become an ideal way to achieve these targets. A versatile and practical shading solution, aluminium offers architects and engineers alike a product which displays the benefits of low weight, high strength, corrosion resistance, thermal conductivity, privacy, sound and shock absorption capabilities. These features coupled with aluminium's capability to be fabricated to a custom design make it the leading choice for all architectural projects.

Visual Impact

Along with the proven environmental credentials that louvre systems offer, Aluminium Industries Architectural Systems recognises that the overall visual impact and design is a huge factor in determining the overall success of a project. Whether your project might be for urban infrastructure, retail, corporate or domestic, we offer a product range which can compliment any need. From fixed elliptical through continuous rotating to square profile we're sure you'll find a product that suits your needs.

Innovative Design

Aluminium Industries Architectural Systems also offer a complete custom design service. If your project needs a louvre system with specific functionality and aesthetics, we offer a complete service from consultation through to fabrication. Our design service features onsite CAD and 3D prototyping capabilities. Whatever your need just talk to our experienced team of specialists and we're sure we can provide you with a great result.

Combining our vast experience in aluminium fabrication and our growing reputation in the marketplace we can provide an ideal partnership with your architectural and engineering team. If your project requires external louvre systems, whether they be simple or complex, Aluminium Industries Architectural Systems provide you with not only a comprehensive range of products, but also the service levels and flexibility that you expect.

For full technical information on our Louvre Systems range, please refer to our Architectural Systems Catalogue or call us on +61 3 9798 4433.

- sustainable technology
- low weight
- high strength
- corrosion resistance
- thermal conductivity efficiency
- privacy
- sound and shock absorption capabilities
- visual impact
- great range
- custom design service
- 3D prototyping
- flexibility of service
- experience
