

HAWA **Antea 50-80**

trendy sliding glass/timber door solutions

HAWA ANTEA 50-80

A Trendy Furniture Sliding Glass/Timber Door Solution that offers freedom of design.

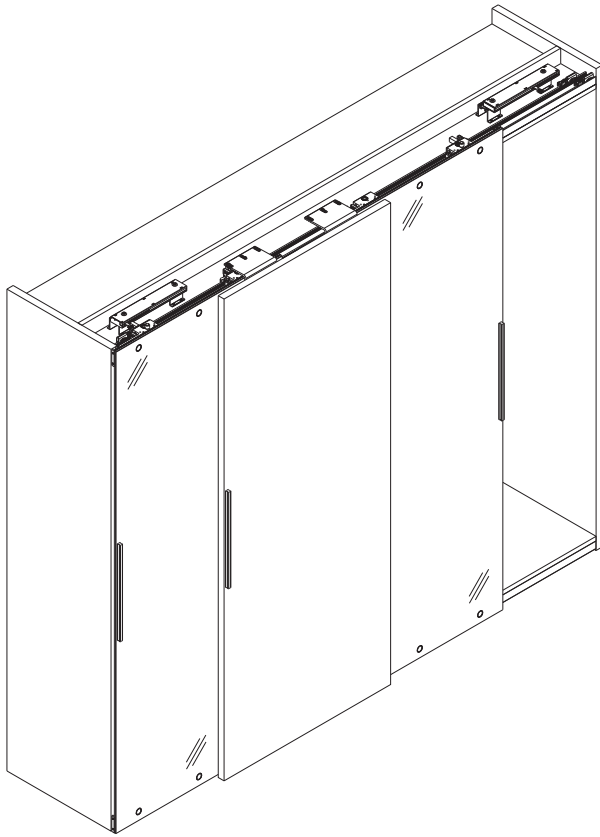

Cabinet fronts are really starting to move. All thanks to the innovative HAWA Antea 50-80 that makes it especially easy to handle large and heavy sliding furniture doors made of timber and/or glass. This is due in part to the system's ability to move doors measuring up to four square metres smoothly and quietly whilst offering you ample room for inspirational and innovative design ideas with mixed materials by means of individual hardware sets for glass and wooden doors. The fact that there are no visible screws or functional parts adds to the beauty of the visual appearance. This makes HAWA Antea 50-80 not only predestined for cabinet walls in high-quality, design-oriented interior fittings, but also a solution well worth seeing in public and commercial buildings.

About the product

The HAWA Antea 50-80 offers the versatility of an all-glass system with a modular design and form-fitting, totally safe fastenings. And there are no less than four attractive design options to choose from: from puristically reduced patch suspension to classic horizontal and vertical profiles to the unadorned, elegant appearance of a frame with vertical seals.

The advantages the HAWA Antea 50-80 has to offer during assembly simply cannot be overlooked. Top tracks and guide tracks, for instance, are attached to the front of the cabinet body for both timber and glass solutions; timber doors can even be installed without tools, height adjustments to the trolley are made conveniently from the side. And the plain anodised covering screens that blend harmoniously with any colour design simply clip into place.

Technical specifications	
Door weight	50, 80 kg
Door width	800 - 1500 mm
Door thickness wood	19 - 28 mm
Door thickness glass (toughened safety glass)	8 mm
Max. door height	2600 mm

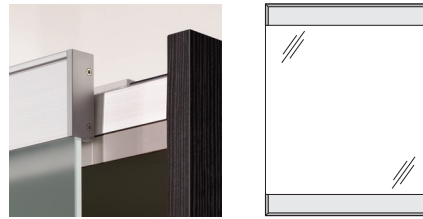

At a glance

- Glass and timber combinations possible thanks to individually available door sets.
- Modular all-glass system with 4 design options: patch suspension, horizontal covers, vertical profiles or frame look.
- Ideal running properties thanks to trolleys with high-quality sleeve bearings for door weights of up to 50kg and ball bearings for up to 80kg.
- Just 30mm distance to ceiling and floor for designs without large connection joints.
- High-quality soft closing system decelerates and stops doors gently.
- Clip-on covering screens discreetly hide top and guide tracks.
- Efficient glazing with no need to wedge and centre profiles: thanks to a patented rubber profile that prevents silicone from oozing out.
