EXTRACTION FAN
WITH HEAT RECOVERY

mono DF

Dual Flow Extraction Fan.

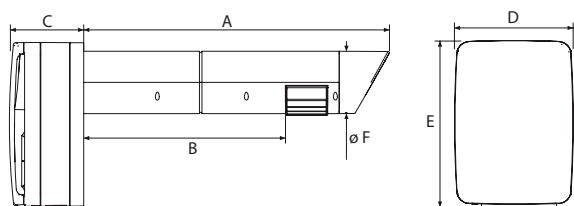

- FRESH AIR EXCHANGE
- COMFORT
- ENERGY AND COST SAVINGS

Atlantic's Mono DF (dual flow) extraction fan provides continuous air exchange and heat recovery in kitchens, bathrooms, washrooms, locker rooms and small buildings.

Stale, moisture-laden air is replaced by fresh, warmed air from the outside. Not only are pollutants removed but by balancing the relative humidity condensation, mould growth and other problems are significantly reduced.

- Improved air quality.
- Up to 75% heat recovery providing significant energy and cost savings.
- Payback time is estimated to be 4 years compared to a standard extraction fan.
- Virtually silent - whisper quiet operation.
- Energy efficient motor: only 2 watts.
- Optional fan speeds.
- Filters can easily be removed and washed.
