Louvre & Shutter Systems Australia

## **LSSA ALUMINIUM ELIPTICAL MOVEABLE AND FIXED LOUVRES**

LSSA has a innovative new concept in the manufacture of louvre systems.

Our Louvre system is architecturally designed with emphasis on durability, security and structural integrity. The trend is now towards Alfresco entertainment areas and our shutters enhance any area, are aesthetically pleasing and provide shade, ventilation, and privacy when needed. Designed for both interior and exterior use, our shutters are elegant in appearance. The internal drive mechanism is housed within the frame to provide unobstructed views.

We provide quality hardware to incorporate ease of operation and functionality. The operation of Bi-folding, Sliding or Stacking allow you to make the most of all areas of your property.

**Manufactured of aluminium, we do provide a limited warranty on our product.**  
*Manufactured in Australia by Australians.*
