

markilux fabrics - the new collections

Award-winning German awning manufacturer, **markilux**, has launched three new exclusive fabric lines to complement its range of premium folding-arm, conservatory and window awnings. Signature Sunsilk SNC, Perla FR and Transilk FR promise innovation and style with new exclusive features including self-cleaning and fire retardant properties. A dynamic and fresh new collection of colours, prints and new ground breaking fabric technologies make these unique fabrics the perfect choice for private and commercial applications. Discover for yourself why **markilux** remains the best choice in sun shading.

signature sunsilk SNC (Schmitz Nano Clean)

A light, silky fabric woven from high-tech polyester that gives brilliant colour and light. The **markilux** exclusive Signature collection features the extraordinary self-cleaning "finish" that repels dirt, grease, oil and water, ensuring low maintenance and a radiant lasting colour.

Signature – timeless elegance

sunsilk perla FR

Designed exclusively for **markilux** folding-arm and conservatory awnings, Perla FR offers unique all-weather performance. Rated 90-100% waterproof, UPF 50+ and flame retardant, combined with **markilux's** innovative ultrasonic heat bonding technique, the **markilux Perla FR** is the commercially sound choice.

Perla FR – slick innovation

transilk FR

Ideal for smaller conservatory and window awnings, Transilk FR is a woven hi tech polyester with a semi-transparency which dramatically reduces heat loadings, reflects light and breaks down the UV while not disturbing the view. With its inherent flame retardant properties, this fabric is the ideal choice for restaurants, pubs and child care facilities.

Transilk FR – fresh transparency
