Why Staron®?

Staron® is a technologically advanced product manufactured from a natural mineral refined from bauxite and blended with pure acrylic resin.

Staron's solid homogeneous surface will not support bacteria or mildew growth. In fact it meets the NSF-51 National Sanitation Accreditation for safe food hygiene. Furthermore, fused inconspicuous seamless joins eliminate crevices for dirt or bacteria to harbour or even moisture to damage. Even odours will not absorb onto Staron®.

Staron® is a non-porous, stain resistant surface that is easy to keep clean. Whether preparing fish, red meat or delicate pastry, Staron® offers a unique hygienic worktop for food preparation that will clean up with ease. Staron® can be cleaned up immediately with soap and water, while stubborn marks which have been allowed to set (even cigarette burns) can be scrubbed off using a common abrasive household cleaner.

Guaranteed to last

Staron® is designed to last and is backed by Samsung's 10-year installed, transferable limited warranty when installed by our certified, trained fabricators.

A practical solution

While most people initially choose Staron® for its visual appeal, they are soon equally excited by its practicality and easy maintenance. Once you compare Staron's® benefits to other countertop materials the choice is easy!

PLEASE NOTE:

Printed colours may vary from actual samples.
Dark colours will require more frequent maintenance.

Tempest by Staron® Surfaces is a solid alternative specifically designed with a look that rivals stone and quartz. Yet it offers all the features and benefits that designers and end-users demand of solid surface, including a seamless appearance and nonporous, hygienic properties. The visual difference is in Tempest's larger clear particulate, which gives the material an amazing depth not seen before in solid surface. This combination of a quartz appearance and solid surface practicality makes Tempest the ideal surface for any commercial or residential application.

Staron® sinks and bowls are available in Bright White and will further compliment your benchtop as they form one continuous surface when seam mounted. This seamless application prevents water damage and allows one continuous cleaning motion when wiping from the benchtop into the sink. There is nowhere for germs, mould or dirt to build up, ensuring the most hygienic sink application available. Stainless steel sinks also contrast beautifully with Staron® and can also be undermounted making cleaning easy.

CREATIVE

INNOVATIVE

Staron® offers a complete range of solid surface sinks and bowls for the kitchen and bathroom
