TERRACOTTA FAÇADE SYSTEM

 **australbricks™**
since 1908

PRODUCT APPLICATIONS:

CREATIVE IN COLOUR, CREATIVE IN APPLICATION

Whatever the design challenge, Terraçade TN™ frees the imagination. The beauty and longevity of real terracotta is the perfect construction accompaniment to the natural environment. Its earthy tones make a statement alone or in combination, mixing and matching with effortless elegance. Architects and builders alike

will revel in Terraçade TN's versatility. The façade system doesn't just perform well on new structures – refurbishment of existing buildings is simple, immediately improving thermal qualities and moisture protection. The Terraçade TN system's clever design promotes creativity, innovation and quality in any project, large or small.

Terraçade TN has been designed in consultation with Australia's leading engineers to act as a rain screen and ventilated façade system. It is a lightweight system and is simple to install. The combination of the natural, durable properties of terracotta and the system's modern appeal make Terraçade TN an ideal choice for architectural and residential projects no matter what size.

With a choice of six natural clay colours to suit any construction, Terraçade TN will add a creative and individual finish to your project, large or small.

AVAILABLE IN: 590 x 300mm

TERRAÇADE TN COLOUR PALETTE

01. GIBSON

02. STURT

03. TANAMI

04. SANDY

05. SIMPSON

TERRAÇADE TN™:

SLEEK, STREAMLINED, STYLISH

In either domestic or commercial applications, Terraçade TN offers unrivalled visual impact. The uncluttered minimalist lines lend themselves to bold architectural statements, complementing underlying shapes and forms with streamlined refinement. At the same time, the natural tones,

inspired by the colours of the earth, provide a subtle palette which pleases the eye in perfect harmony with other building materials, such as brick, steel and stone. But Terraçade TN isn't just about the aesthetic.

TERRAÇADE TN™ :

BENEATH THE STRIKING GOOD LOOKS

Beneath the striking good looks there is real substance, a revolutionary natural clay façade system that offers architects and builders design flexibility, installation ease, and superb durability and thermal performance. Its natural strength and innovative fixing system

make it ideal for use in all sorts of climatic conditions even on multi storey structures. Terraçade TN is an instant design classic, an investment in style that is sure to stand the test of time.

Reduce-Reuse-Recycle

BENEFITS:

DURABLE AND SUSTAINABLE FOR LIFE

Durable and sustainable for life. Terraçade TN is at the forefront of sustainable building products, with outstanding environmental credentials from production to packaging. As Terraçade TN is a ventilated facade system it assists in reducing energy use throughout the building. The Terraçade TN tile is made from natural and some recycled materials and the majority of the entire system is not only re-usable but can also be recycled. Combining the innate durability of clay, a unique low-maintenance design, and an ability to weather atmospheric extremes, Terraçade TN is a long-lasting, cost-effective, and environmentally sound choice.

INSTALLATION:

THE TERRAÇADE TN SYSTEM IS EASILY INSTALLED

The Terraçade TN system is easily installed as the lightweight tiles are captured and supported by a purpose designed vertical suspension rail. The versatile hanging system comprises only vertical suspension rails, which ensures simple planning and installation. The innovative system can be installed directly onto a timber framed,

steel framed, concrete or masonry structural wall. For framed structures, an optional waterproof membrane is supplied by Austral Bricks as part of the system's tested performance. In addition, a full range of trims are available in anodised or powder coated finish to complement or highlight your design.

DRY-TREAT SEALERS

While Terraçade TN offers a low maintenance solution to building facades, there may be instances where more severe conditions exist, such as high traffic areas prone to graffiti. For added protection we recommend Dry-Treat sealer. For more information visit www.drytreat.com

FRAMESHIELD 100 MEMBRANE BY PROCTOR

The high water vapour permeability of Frameshield 100 allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture. Frameshield 100 also protects timber frames during construction against wind-driven rain. For more information visit www.proctorgroup.com.au/terracade

QUALITY GUARANTEE:

Austral Bricks' continued commitment to quality and innovation ensures that Terraçade TN™ will remain the benchmark for excellence for many years to come.

Our tradition, experience and financial strength have made Austral Bricks the first choice for many architects, builders and designers.

Terraçade TN™ has a warranty of fifteen years on the system and a lifetime warranty on colourfastness and durability, as per Austral's Warranty for Terraçade.

Contact Austral Bricks to have an architectural consultant visit you with samples and technical information, or to discuss your next project.

Please note: The Terraçade TN™ system replaces the previous Terraçade TN™ system, and some images have been updated to reflect this change. All photographs should be considered indicative of colour and texture only. Variations in colour and shade are inherent in all clay fired products. All Terraçade tiles and accessories should be ordered at the same time to avoid the possibility of batch to batch variations. No responsibility will be accepted for colour selection, matching, blending and any other physical or colour related defects once the tiles have been incorporated into any construction.
