

*Vibrant*

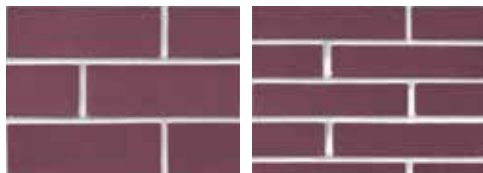

# Vibrant

It's time to have fun!

Finished with a full ceramic glaze, the Vibrant collection's palette of colours is fun and funky, placing a whole new perspective on bricks and the way they are used. Perfect for internal or external use, the collection consists of seven extraordinary colours – Cosmic, Fizz, Paris, Wasabi, Tango, Rhapsody and Watermelon. Vibrant Splits in each colour are also available for more design options.

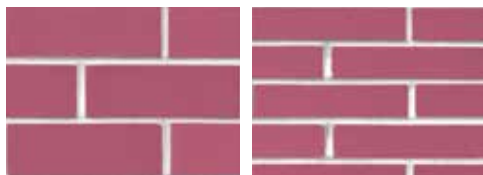

Be warned though – Vibrant bricks will make you stand out!

## TECHNICAL INFORMATION \*Vibrant Splits are made to order.

Product	Vibrant Full Brick	Vibrant Splits*
Working Size – LxWxH (mm)	230x110x76	230x110x50
Average Characteristic Unconfined Compressive Strength (MPa)	> 30	> 30
Salt Attack Resistance	<span>EXP</span>	<span>EXP</span>
Standard Number per Pallet (This will vary depending on ordered quantity).	320	450
Average Weight per Brick (kg)	3.0	2.3
Number of Bricks per sqm	49	69
Void Volume (%)	< 30	< 30
Fire Resistance Level Unrendered	90/90/90	90/90/90
Wall Density (kg/m <sup>2</sup> )	159.25	159.25

- Glazed bricks are one stretcher face only. Single and double headers are available separately and need to be specified per project.
- Glazed shapes are available for more design possibilities. Minimum order quantities and lead times may apply.
- It is recommended that round ironed mortar joints be used when laying glazed bricks to protect the brick edges.
- Please refer to the 'PGH Brick Cleaning Flyer – Fully Glazed Textures' for recommended cleaning tips on pghbricks.com.au
- Brick colours and texture patterns in this flyer are indicative only. To view the latest batch colours, visit one of our Selection Centres.

### Bricks – The Right Choice

If you want your design to stand the test of time when it comes to style, durability, level of maintenance, energy efficiency and long-term value, then brick really is the right choice. Bricks are safe, solid and will last for a very long time with virtually no maintenance. Brick doesn't require any painting or patching. It never fades, warps or rots. And with virtually no effort or expense, your design will look as beautiful 60 years from now, as it does today. What's more, bricks are a sustainable, energy efficient choice. They provide thermal mass, an integral part of energy efficient design, and a proven way to reduce the need for heating and cooling devices.
