

## Architects and Engineers use eTrack for greater success...

eTrack is the perfectly tailored software tool for all Building Professionals.

- > *Do you bill everything, accurately, including goodwill and variances.*
- > *Do your staff have easy access to a knowledge base of guidelines, compliance checklists, contact details and job templates?*
- > *Do you know which staff are available and who your profitable clients are?*
- > *Would you like to sleep every night knowing that you are completely organised and nothing has been forgotten?*

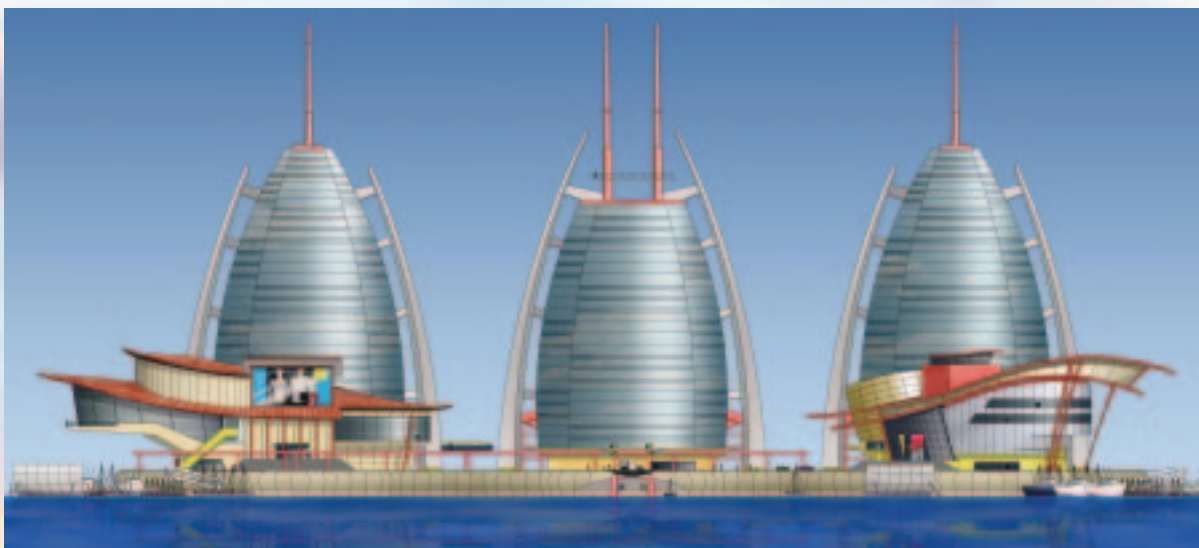

- > *Developed in Australia with ongoing support and upgrades.*
- > *eTrack can be installed and providing benefits in a few hours.*
- > *A small yet extremely valuable investment.*

*Recognised by RAIA and IEA as excellent for members.*

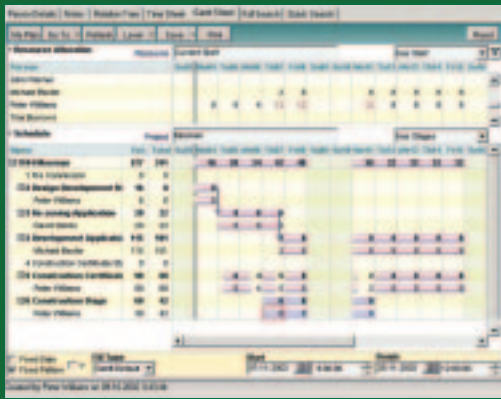

*"The directors of Mellor Gray Architects Pty Ltd found that by using eTrack they have more time to work 'on' their business rather than in it." Tony Grey*

*Australian architects use eTrack to track the China Ocean Pearl project in Qing Dao.*

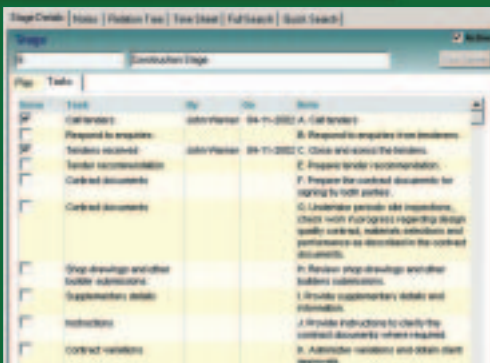

# The eTrack Solution for Architects and Engineers

## Schedules & Resources

## Time Sheet

Compliance

Users work

and much much more...

## Read what some of our Clients have to say...

“Fundamental to all Building Professionals is the allocation of work to staff, the programming of that work to be completed in a timely manner with the correct allocation of resources, the overlay of checklists for quality assurance and the capturing of hours and costs for work completed. eTrack has allowed us to draw these disparate and often neglected duties into one refined management system and advance them to new levels. It is self policing and the user friendly nature means staff enjoy implementing the system.”

(Robert) Buckerfield Architects

“The figures extracted from the time sheets are extremely efficient in creating reports, on all project stages which then enable us to prepare accurate design estimates for future jobs, based on past similar projects. The support staff are always extremely helpful and ready to modify the program to suit our company as the need arose.”

Grant Maggs Architects

“As an Architect Director I manage in excess of 60 concurrent building projects, from concept to completion, using eTrack. After studying in depth many other packages we selected eTrack and found it does the task for us in an efficient way. There is also a lot in the software to assist in office improvement, for example using it to assess the productivity of staff.”

Stephan Caldis, Caldis Cook Architects

**A cost effective software tool to set Architects and Engineers up for success**
