

Sustainable Permeable Paving

Atlantis porous paving solutions ideal for the capture and re-use of stormwater runoff.

- Efficient Water Capture & Infiltration
- Sustainable Edge Drainage for Hard Paving
- Alternative to Sumps, Pits & Drains
- Supports Heavy Vehicle Traffic & Loads
- Continued Infiltration Capacity
- Rigid Installation with Heavy Duty Clips

New Easy Clipping System

Sustainable Edge Drainage

Sustainable Water Solutions for Landscaping

www.atlantiscorp.com.au

At Atlantis, we're committed to providing solutions for a sustainable future.

The Green City concept is the reason why Atlantis exists as a company today. Our vision is to build green cities that provide a sink for carbon, cool cities, beautify the urban landscape, and clean, filter and reuse water through natural infiltration.

We have offices and partners around the world and our team of environmental engineers, landscape architects and biologists have years of collective experience in the field.

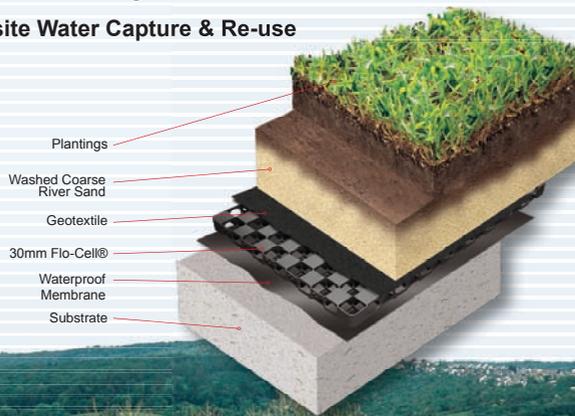

Sustainable Roof Gardens

Atlantis delivers the most effective solutions for sustainable water management of rooftop gardens, planter boxes and podiums, including re-use of water, void space fill and drainage.

- Clean Water Discharge
- Lightweight Void Space Fill
- Reduce Temperature of Buildings
- Efficient Sustainable Drainage
- Preservation of Building Structures
- Sustainable Garden Life
- Optimum Growing Conditions
- Onsite Water Capture & Re-use

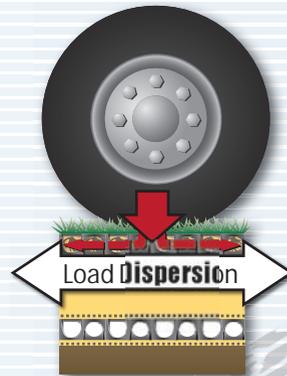

Sustainable Permeable Surfaces

Create a sustainable permeable surface that preserves the soil porosity and prevents compaction.

- Protects Root Zone
- Ideal for Gravel Containment
- Disperse Heavy Loads
- Prevents Soil Compaction
- Maintains Soil Porosity
- Reduce Temperature of Buildings
- Efficient Sustainable Drainage
- Sustainable Turf Life
- Optimum Growing Conditions for Turf
- Convert Surfaces into Permeable Water Catchments
- Create ACCESS ROADS, DRIVEWAYS, PARKING LOTS

Maintain's Soil Porosity

Prevents TYRE Ruts!

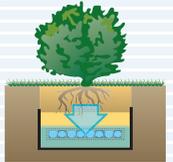

Sustainable Rainwater Harvesting

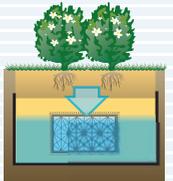

Our rainwater harvesting systems provide unlimited opportunities for the re-use and capture of water from multiple sources.

Why Use Atlantis® Rainwater Tanks?

- **Unlimited Capacity**
- Atlantis® tanks can be constructed to hold any volume of water required.
- **Use Valuable Space**
- Atlantis® tanks are installed underground providing more usable space for gardens.
- **Capture water from multiple sources**
- Water can be captured from the entire catchment area of the site including garden beds, paved areas and roofs.
- **Clean Water Storage**
- Only clean filtered water is stored within the tank system.
- **Strong Structural Design**
- Atlantis® tanks are structurally strong and can withstand loads of up to 277 t/m².
